INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF BLOM BANK SAL

Adverse opinion

We have audited the consolidated financial statements of Blom Bank SAL (the "Bank") and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as at 31 December 2019, and the consolidated income statement, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, because of the significance of the matters discussed in the "Basis for adverse opinion" section of our report; the accompanying consolidated financial statements do not present fairly, the consolidated financial position of the Group as at 31 December 2019, its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for adverse opinion

- 1. As disclosed in note 47.3 to the consolidated financial statements, the Group holds assets with the Central Bank of Lebanon, a portfolio of Lebanese government debt securities, a portfolio of loans to the private sector and other assets concentrated in Lebanon. As disclosed in note 1, the accompanying consolidated financial statements do not include IFRS 9 adjustments to the carrying amount of these assets and related disclosures that would result from the resolution of the uncertainties disclosed therein and the future effects of the economic crisis and the restructuring plan. In addition, as disclosed in note 42, they do not include IFRS 13 fair value disclosures for these financial assets and other financial instruments concentrated in Lebanon. Had such adjustments and disclosures been made, many elements and related disclosures in the accompanying consolidated financial statements would have been materially affected. The effects on these consolidated financial statements have not been determined.
- 2. The events and conditions described in note 1 and the matters described in paragraph 1 above, affect the liquidity, solvency and profitability of the Group and represent events and conditions that may cast significant doubt on the Group's ability to continue as a going concern. We were unable to obtain sufficient appropriate audit evidence about the Group's ability to continue as a going concern and the accompanying consolidated financial statements do not include an adequate disclosure of management's plan to deal with events and conditions giving rise to the material uncertainty.
- 3. As disclosed in note 35 to the consolidated financial statements, due to regulatory requirements enacted since 2016, the Group carried excess provisions of LL 160,945 million (the "excess provisions") as at 31 December 2018. This caused us to qualify our opinion on the consolidated financial statements relating to previous years affected by these regulatory requirements, as these transactions constitute a departure from International Financial Reporting Standards (IFRS). During 2019, the Group wrote-back an amount of LL 76,380 million under "other operating income" and transferred the remaining balance of LL 84,565 million towards additional IFRS 9 allowances for the year.

Accordingly, profit for the year ended 31 December 2019 was overstated by LL 160,945 million and opening retained earnings as at 1 January 2019 was understated by the same amount (2018: profit for the year was overstated by LL 49,934 million and "provisions for risks and charges" was overstated and total equity was understated by LL 160,945 million as at 31 December 2018).

Basis for adverse opinion (continued)

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in Lebanon, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our adverse opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended 31 December 2019. Except for the matters described in the "Basis for adverse opinion" section, we have determined that there are no other key audit matters to communicate in our report.

Other information included in the Group's 2019 annual report

Other information consists of the information included in the Group's 2019 annual report other than the consolidated financial statements and our auditors' report thereon. Management is responsible for the other information. The Group's 2019 annual report is expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Auditors' responsibilities for the audit of the consolidated financial statements (continued)

As part of an audit in accordance with ISAs, we exercise professional judgements and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether
 due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a
 material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Ernst & Young

At 31 December 2019

1 CORPORATE INFORMATION

BLOM Bank SAL (the "Bank"), a Lebanese joint stock company, was incorporated in 1951 and registered under No 2464 at the commercial registry of Beirut and under No 14 on the banks' list published by the Central Bank of Lebanon. The Bank's head office is located in Verdun, Rashid Karameh Street, Beirut, Lebanon. The Bank's shares are listed on the Beirut Stock Exchange and Luxembourg Stock Exchange.

The Bank, together with its affiliated banks and subsidiaries (collectively the "Group"), provides a wide range of retail, commercial, investment and private banking activities, insurance and brokerage services through its headquarter as well as its branches in Lebanon and its presence in Europe, the Middle East and North Africa. Further information on the Group's structure is provided in note 3

The consolidated financial statements were authorized for issue in accordance with the Board of Directors' resolution on 19 June 2020.

1.1 Macroeconomic environment

More than 80% of the Group's operations during 2019 were in Lebanon that has been witnessing, since 17 October 2019, severe events that have set off an interconnected fiscal, monetary and economic crises as well as deep recession that have reached unprecedent levels.

Sovereign credit ratings have witnessed a series of downgrades by all major rating agencies and reached the level of default when, on 7 March 2020, the Lebanese Republic announced that it will withhold payment on the bonds due on 9 March 2020, which was followed by another announcement on 23 March 2020 for the discontinuation of payments on all of its US Dollars denominated Eurobonds.

Throughout this sequence of events, the ability of the Lebanese Government and the banking sector in Lebanon to borrow funds from international markets was significantly affected. Banks have imposed unofficial capital controls, restricted transfers of foreign currencies outside Lebanon and significantly reduced credit lines to companies and withdrawal of cash to private depositors, all of which added to the disruption of the country's economic activity, as the economic model of Lebanon relies mainly on imports and consumption. Businesses are downsizing, closing or going bankrupt and unemployment and poverty are rising fast and have reached unprecedent levels.

The difficulty in accessing foreign currencies lead to the emergence of a parallel market to the peg whereby the price to access foreign currencies has been increasing constantly, deviating significantly from the peg of 1,507.5 US\$/LL. This has resulted in an uncontrolled rise in prices and the incessant de facto depreciation of the Lebanese pound, impacting intensely the purchasing power of the Lebanese citizens, driving high inflation and rise in the consumer price index.

The economy has been contracting at an accelerating pace since the last quarter of 2019 and the coronavirus affecting Lebanon and the whole world is contributing to further deterioration of the economic environment, disruption of businesses, rise of unemployment, and rise in poverty lines.

On 30 April 2020, the council of ministers approved the Lebanese Government's Financial Recovery Plan (the Plan). The Plan relies on nine central and interrelated pillars, namely reviewing the peg policy; a comprehensive government debt restructuring; a comprehensive restructuring of the financial system addressing accumulated FX mismatches, embedded losses and resizing the banking sector (see below); a strong phased fiscal adjustment, focused on improving tax compliance, streamlining expenditure and reforming the public sector; growthenhancing reforms promoting a productive economy and enhancing the competitiveness of the Lebanese economy; a social sector reform; ambitious anti-corruption strategy; environmental reform; and international financial assistance to close the large external financing gap and finance the development of the infrastructures that are necessary to support the growth of the economy.

On 1 May 2020 the Lebanese Prime Minister and the Lebanese Finance Minister signed a request for aid from the International Monetary Fund. The Government believes the Plan conveys good faith for negotiations with the International Monetary Fund. Lebanon began detailed discussions with the IMF on 1 May 2020.

At 31 December 2019

1 CORPORATE INFORMATION (continued)

1.1 Macroeconomic environment (continued)

Multilateral intervention is expected to catalyze additional external support and unlock US\$ 11 billion in pledges from international donors made in 2018 in the Conference Economique pour le Development par les Reformes et avec les Entreprises (CEDRE) as well as other external financial support to cover the net external financial needs for a gradual economic recovery and successful restructuring of the Government foreign currency debt.

Restructuring of the banking sector:

As per the plan, the preliminary global estimation of losses will result from the restructuring of the Central Bank of Lebanon and impairment of assets held at the Central Bank of Lebanon; the impact of the economic crisis and the impairment of the banks' loans portfolio; and the government debt restructuring and impairment of the government securities portfolio.

An Asset Quality Review will be conducted by an international institution to assess the impairment losses on the private loans portfolio of the banking sector. The impact of losses and the recapitalization needs will be determined on a bank by bank basis when a more granular plan is drawn, and further measures related to bank deposits will be determined. On a bank by bank basis, the Plan that stipulates that large depositors could be offered voluntarily (for part of their deposits):

- Conversion into their bank's capital. New legal provisions will be needed
- Conversion into tradable equity stakes in a newly established special Recovery Fund that will receive
 the proceeds of the ill-gotten assets tracking and recovery program
- · Conversion into long dated, subordinated bank obligation with no or limited interest

Banks will be asked to propose to the authorities and relevant supervisory bodies business plans and restructuring / recapitalization plans including mergers with or acquisitions by other domestic and foreign banks to address their structural funding issues and generate synergies. The new capital base will be rebuilt via capital raising in the market and a conversion of some deposits into shares. Fresh liquidity will be provided to the reorganized banking sector.

Conducting a full restructuring of the banking sector will require new legal powers for the government and the relevant supervisory bodies.

1.2 Regulatory environment

Throughout this period and up to the date of the authorization of these consolidated financial statements, the Central Bank of Lebanon has issued several circulars to address the situations, mainly:

- Intermediary Circular 532 issued on 4 November 2019 requiring Lebanese banks not to distribute dividends from the profits of the financial year 2019, and increase the regulatory capital by 20% of the Common Equity Tier 1 capital as at 31 December 2018 through cash contributions in US Dollars, in two phases: 10% by 31 December 2019 and another 10% by 30 June 2020.
- Intermediary Circular 534 issued on 19 November 2019 extending the deadline for reaching the 25% ratio
 of "net loans granted in LL / net deposits in LL" from 31 December 2019 to 31 December 2020. Banks
 that expect to be unable to reach said ratio within the set time limit may refer to the Central Bank of
 Lebanon Central Council before 31 December 2020.
- Intermediary Circular 536 issued on 4 December 2019 stating that the Central Bank of Lebanon will settle
 the interest on the banks' term deposits and certificates of deposits in US Dollars 50% in US Dollars and
 50% in LL. As for the deposits received or renewed after 4 December 2019, banks have to comply with
 the following interest rates:
 - 5 % for deposits in foreign currencies; and
 - 8.5 % for deposits in LL

As for the deposits received before the mentioned date, which conditions are maintained, banks have to pay interests divided as follows: 50 % in the account's currency and 50 % in LL. This decision is applicable until 4 June 2020 (6 months from the circular's issuing date).

At 31 December 2019

1 CORPORATE INFORMATION (continued)

1.2 Regulatory environment (continued)

- Intermediary Circular 542 issued on 3 February 2020 requiring that the ratios of expected credit losses for the years 2019 and 2020 on LL and foreign currency-denominated investment portfolio at the Central Bank of Lebanon, including certificates of deposits and investments in Lebanese treasury bills denominated in I.I. and foreign currency, not to exceed the regulatory expected credit losses ratios calculated as per the Central Bank of Lebanon Basic Circular no. 44 related to the "Capital Adequacy Ratio".
- Intermediary Circular 543 issued on 3 February 2020, increasing the regulatory expected credit losses on foreign currency exposures to Lebanese Sovereign and Central Bank of Lebanon and exposures to resident corporates, retail and SMEs. The circular increased risk weights to be applied on exposures to the Central Bank of Lebanon in foreign currencies and lowered the minimum required capital adequacy ratios. The circular also imposed maximum expected credit losses on exposures to Lebanese Sovereign and Central Bank of Lebanon to be recorded in the banks' financial statements as per the table below:

Type of financial instrument

Exposures to Central Bank of Lebanon in foreign currencies Exposures to Central Bank of Lebanon in Lebanese Lira Lebanese Government securities in foreign currencies Lebanese Government securities in Lebanese Lira Maximum loss rate
Up to 1.89 %
0 %
Up to 9.45 %
0 %

- Intermediary Circular 544 issued on 13 February 2020 requiring banks to abide with the maximum ceilings of interest rates on new or renewed deposits, as follows:
 - deposits in foreign currencies: 2% for 1-month deposits, 3% for 6 months deposits and 4% on deposits for a year and above
 - deposits in LL: 5.5% on deposits for one month, 6.5 % for 6 months and 7.5% on deposits for one year and above.

Banks are required to calculate the BRR based on the above creditor interest rates. This decision is applicable until 13 August 2020 (6 months from the circular's issuing date).

- Basic Circular 148 issued on 3 April 2020 requesting banks to allow clients with small accounts to
 withdraw cash paid in LL by first calculating the equivalent of the account balance in US Dollars at the
 official exchange rate, then paying an amount of cash in LL equal to the counter value of the calculated
 amount as per the market exchange rate. US Dollars amounts resulting of these operations should be sold
 to the Central Bank of Lebanon as per the market exchange rate.
- Basic Circular 149 issued on 3 April 2020 announcing the creation of a special unit at the Central Bank of Lebanon to conduct FOREX operations as per the market rate. Money dealers (of "type A") may adhere to this unit, upon Central Bank of Lebanon's discretion. An electronic platform will be created encompassing the Central Bank of Lebanon, banks and money dealers for FOREX operations. Abrogating the article 18 which was introduced by Intermediary Circular no. 546 to basic circular no. 3 related to Money Dealers.
- Basic Circular 151 issued on 21 April 2020 concerning the clients that are not tackled in Basic Circular 148 who wish to withdraw amounts of cash from their foreign currencies accounts, banks should settle, with the client's consent, the equivalent of those amounts in LL as per the market exchange rate. The resulting foreign currencies should be sold to the Central Bank of Lebanon. The exchange rate specified by the Central Bank of Lebanon in its transactions with banks will remain applicable to all other operations in US Dollars. Banks should disclose daily their adopted market exchange rate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS At 31 December 2019

1 CORPORATE INFORMATION (continued)

1.2 Regulatory environment (continued)

• Intermediary Circular 552 issued on 22 April 2020 requesting banks to grant loans against the settlement of facilities and instalments due during the months of March, April, May and June for the clients who are not able to pay their dues, due to current economic situation as assessed by the Bank. The new loans are to be granted up to 5 years starting 30 June 2020 and on condition, among others, that these are granted to repay the above months settlements or, if the client is an establishment or corporation, to pay the staff or the production and operational fees, with no commissions or fees and zero interest rate. The Central Bank of Lebanon will grant the banks loans with zero interest rate against the said loans.

1.3 Particular situation of the Group

As indicated in note 2.5, assets and liabilities in foreign currency as of 31 December 2019 were valued at the official exchange rate of 1,507.5 US\$ / LL. However, several exchange rates have emerged since the last quarter of 2019 that vary significantly among each other and from the official exchange rate: parallel exchange markets with high volatility, recently issued Central Bank of Lebanon circulars, estimation exchange rates detailed in the Plan, in addition to a wide range of exchange rates adopted for commercial transactions currently undertaken in the Lebanese territory. These consolidated financial statements do not include adjustments from any future change in the official exchange rate. The impact of the valuation of the assets and liabilities in foreign currencies at a different rate is expected to be significant and will be recognized in these consolidated financial statements once the revamping of the peg is implemented by the Lebanese Government. FX currency mismatch is detailed in note 48A to the consolidated financial statements.

Loss allowances on assets held at the Central Bank of Lebanon and the portfolio of Lebanese government securities held at amortized cost are recorded in these consolidated financial statements based on the guidelines issued on 4 February 2020 by the Central Bank of Lebanon in its intermediary circular 543 (refer to above). Accordingly, these consolidated financial statements do not include adjustments of the carrying amount of these assets to their recoverable amounts based on International Financial Reporting Standards and an expected credit losses model. The impact is expected to be pervasive and will be reflected in the consolidated financial statements once the debt restructuring has been defined conclusively by the Government and all uncertainties and constraints are resolved and the mechanism for allocating losses by asset class and currency is clear and conclusive. Maximum exposures to the credit risk of the Central Bank of Lebanon and the Lebanese government and the recognized loss allowances, as well as their staging are detailed in note 47 to these consolidated financial statements.

As a result of the negative economic conditions and the deepening of the recession, the credit quality of the private loans portfolio concentrated in Lebanon has significantly deteriorated since the last quarter 2019. The management is undergoing massive deleveraging by reducing these assets' size and has set up a centralized and specialized remedial function to proactively review and manage the quality of these assets. Loss allowances on the Group's portfolio of private loans have been estimated and recorded based on the best available information at the reporting date, about past events, current conditions and forecasts of economic conditions combined with expert judgements. The exercise being carried out by the management is expected to reveal additional embedded losses in its private loans portfolios. The impact is expected to be pervasive and will be reflected in the consolidated financial statements once the results of the exercise undertaken by the management are measurable and determinable. Maximum exposures to the credit risk of the Group's portfolio of private loans and the recognized loss allowances, as well as their staging are detailed in note 47 to these consolidated financial statements.

Management has significant concerns about the effects that the above matters will have on the equity of the Group and the recapitalization needs that will arise once the necessary adjustments are determined and recorded.

At 31 December 2019

1 CORPORATE INFORMATION (continued)

1.3 Particular situation of the Group (continued)

In line with the comments issued by the Association of Banks in Lebanon on 1 May 2020, management has determined the following uncertainties in relation to the assumptions of the Plan which might have an impact on the figures and estimations provided therein:

- Ability to successfully secure sufficient external financing (from the IMF, from CEDRE and from other international donors unspecified in the Plan)
- Ability to revamp the peg at the detailed estimated rates
- Parameters of the restructuring of the Central Bank of Lebanon and restructuring of the government debt in foreign currencies
- Ability of issuing new laws with the constraints in the legal framework and the Lebanese constitution
- Finalization of the Asset Quality Review and determination of losses and recapitalization needs of the banks
- Ability to claw back sums which have unlawfully escaped the country
- Ability to claw back dividend and /or interest distributed over the last years

Besides, on 20 May 2020, the Association of Banks in Lebanon submitted an alternative approach in response to the present economic crisis that Lebanon, and particularly the banking sector, is experiencing. It rests on addressing the external financing needs, while avoiding an internal debt default; and the launch of long-overdue structural reforms to promote sustainable and inclusive growth as the result of economic diversification.

Until the above uncertainties are resolved and a plan is implemented, the Group will continue its operations as performed since 17 October 2019 and in accordance with the applicable laws and regulations. Unofficial capital controls and inability to transfer foreign currencies to correspondent banks outside Lebanon are exposing the Group to litigations that are dealt with on a case by case basis when they occur. Meanwhile, the Group is exerting extended efforts to review the quality of its private loans portfolio and deleveraging it as appropriate, to reduce its commitments and contingencies to correspondent banks outside Lebanon and to secure its liquidity needs through mainly borrowing from the Central Bank of Lebanon at the available rates and by selling foreign assets.

Once the above uncertainties are resolved, a pro-forma balance sheet of the Group will be prepared which will include the effects of the revaluation of the assets and liabilities in foreign currencies, the effects of the restructuring of the government debt securities, the effects of the restructuring of the Central Bank of Lebanon, and the effects on its private loan portfolio.

As disclosed in note 53 to these consolidated financial statements, the Group's capital adequacy ratio as at 31 December 2019 was calculated based on the recorded figures and does not take into consideration the adjustments that will result from the resolution of the uncertainties reflected above. The Group did not comply with Central Bank of Lebanon intermediary circular 532 towards increasing its regulatory capital by 10% by 31 December 2019; however, the process of increasing regulatory capital was initiated subsequently and put on hold during COVID-19 crisis. The management is currently assessing and developing restructuring and recapitalization plans based on the various available scenarios. However, a reasonable and credible plan can only be achieved once the above uncertainties are resolved and the amount of recapitalization needs is accurately determinable.

2 ACCOUNTING POLICIES

2.1 Basis of preparation

The consolidated financial statements have been prepared on a historical cost basis except for; a) the restatement of certain tangible real estate properties in Lebanon according to the provisions of law No 282 dated 30 December 1993, and b) the measurement at fair value of derivative financial instruments, financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income.

The consolidated financial statements are presented in Lebanese Lira (LL) and all values are rounded to the nearest LL million, except when otherwise indicated.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.1 Basis of preparation (continued)

Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), and the regulations of the Central Bank of Lebanon and the Banking Control Commission ("BCC").

Presentation of consolidated financial statements

The Group presents its consolidated statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within one year after the consolidated statement of financial position date (current) and more than 1 year after the statement of financial position date (non-current) is presented in the notes.

Financial assets and financial liabilities are generally reported gross in the consolidated statement of financial position. They are offset and the net amount is reported only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis – or to realise the assets and settle the liability simultaneously – in all of the following circumstances: a) the normal course of business, b) the event of default, and c) the event of insolvency or bankruptcy of the Group and/or its counterparties. Only gross settlement mechanisms with features that eliminate or result in insignificant credit and liquidity risk and that process receivables and payables in a single settlement process or cycle would be, in effect, equivalent to net settlement. This is not generally the case with master netting agreements, therefore the related assets and liabilities are presented gross in the consolidated statement of financial position. Income and expense will not be offset in the consolidated income statement unless required or permitted by any accounting standard or interpretation, as specifically disclosed in the accounting policies of the Group. The effect of netting arrangements is disclosed in note 30.

2.2 Basis of consolidation

The consolidated financial statements comprise the financial statements of BLOM Bank SAL and its subsidiaries as at 31 December 2019, Details of the principal subsidiaries are given in note 3.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee):
- Exposure, or rights, to variable returns from its involvement with the investee; and
- > The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. However, under individual circumstances, the Group may still exercise control with less than 50% shareholding or may not be able to exercise control even with ownership over 50% of an entity's shares. When assessing whether it has power over an investee and therefore controls the variability of its returns, the Group considers all relevant facts and circumstances, including:

- > The purpose and design of the investee;
- > The relevant activities and how decisions about those activities are made and whether the Group can direct those activities:
- > Contractual arrangements such as call rights, put rights and liquidation rights; and
- > Whether the Group is exposed, or has rights, to variable returns from its involvement with the investee, and has the power to affect the variability of such returns.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.2 Basis of consolidation (continued)

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it derecognizes the related assets (including goodwill), liabilities, non-controlling interest and other components of equity while any resultant gain or loss is recognized in profit or loss. Any investment retained is recognized at fair value at the date of loss of control.

Where the Group loses control of a subsidiary but retains an interest in it, then such interest is measured at fair value at the date that control is lost with the change in carrying amount recognized in profit or loss. Subsequently, it is accounted for as an equity-accounted investee or in accordance with the Group's accounting policy for financial instruments depending on the level of influence retained. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. As such, amounts previously recognized in other comprehensive income are transferred to consolidated income statement.

Non-controlling interests

Non-controlling interest represent the portion of profit or loss and net assets of subsidiaries not owned by the Group. The Group has elected to measure the non-controlling interest in acquirees at the proportionate share of each acquiree's identifiable net assets. Interests in the equity of subsidiaries not attributable to the Group are reported in consolidated equity as non-controlling interests.

Profit or loss and each component of OCI are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

The Group treats transactions with non-controlling interests as transactions with equity holders of the Group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

2.3 New and amended standards and interpretations

The Group applied for the first time certain amendments to the standards, which are effective for annual periods beginning on or after 1 January 2019. The nature and the impact of each new amendment is described below:

IFRS 16 Leases

Effective from 1 January 2019, the Group adopted IFRS 16 Leases, which supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for most leases on the balance sheet.

Lessor accounting under IFRS 16 is substantially unchanged from IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 did not have an impact for leases where the Group is the lessor.

The Group adopted IFRS 16 using the modified retrospective method of adoption with the date of initial application of 1 January 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognised at the date of initial application. The Group elected to use the transition practical expedient to not reassess whether a contract is or contains a lease at 1 January 2019. Instead, the Group applied the standard only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 at the date of initial application.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.3 New and amended standards and interpretations (continued)

IFRS 16 Leases (continued)

The Group has lease contracts for various branches, motor vehicles and other assets. Before the adoption of IFRS 16, the Group classified each of its leases (as lessee) at the inception date as either a finance lease or an operating lease. Refer to note 2.5 for the accounting policy prior to 1 January 2019.

The Group also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option ('short-term leases'), and lease contracts for which the underlying asset is of low value ('low-value assets'). Refer to note 2.5 for the accounting policy beginning 1 January 2019. The standard provides specific transition requirements and practical expedients, which have been applied by the Group.

Leases previously classified as finance leases

The Group did not change the initial carrying amounts of recognised assets and liabilities at the date of initial application for leases previously classified as finance leases (i.e., the right-of-use assets and lease liabilities equal the lease assets and liabilities recognised under IAS 17). The requirements of IFRS 16 were applied to these leases from 1 January 2019.

Leases previously accounted for as operating leases

The Group recognised right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. The right-of-use assets for most leases were recognised based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. In some leases, the right-of-use assets were recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The Group also applied the available practical expedients wherein it:

- Used a single discount rate to a portfolio of leases with reasonably similar characteristics;
- Relied on its assessment of whether leases are onerous immediately before the date of initial application;
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application; and
- Used hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

As at 1 January 2019, the effect of adoption IFRS 16 as at 1 January 2019 (increase/(decrease)) is as follows:

	31 December 2018 LL million	Impact of IFRS 16 LL million	1 January 2019 LL million
Right-of-use assets	-	4,277	4,277
Prepaid expenses	191	(191)	-
Lease liabilities	-	(4,784)	(4,784)
Effect on net assets and liabilities		(698)	
Net impact on equity		(698)	

Based on the above, as at 1 January 2019, the adoption of IFRS 16 resulted in LL 4,086 million increase in total assets and LL 4,784 million increase in total liabilities. Accordingly, the impact on the Group's equity from the adoption of the IFRS 16 requirements amounted to LL 698 million.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.3 New and amended standards and interpretations (continued)

IFRS 16 Leases (continued)

The lease liabilities as at 1 January 2019 can be reconciled to the operating lease commitments as of 31 December 2018 as follows:

	LL million
Total undiscounted operating lease commitments as at 31 December 2018 Effect of discounting using incremental borrowing rates as at 1 January 2019 (1.51 - 25%)	5,846
Discounted operating lease commitments at 1 January 2019 Less:	
Commitments relating to short-term leases and leases of low-value assets Add:	(3,026)
Payments in optional extension periods not recognised as at 31 December 2018	1,964
Lease liabilities as at 1 January 2019	4,784

Amendments to IFRS 9: Prepayment Features with Negative Compensation

The amendments to IFRS 9 clarify that a financial asset passes the SPPI criterion regardless of an event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract. These amendments do not have any significant impact on the Group's consolidated financial statements.

Amendments to IAS 19: Plan Amendment, Curtailment or Settlement

The IASB issued amendments to the guidance in IAS 19, Employee Benefits, in connection with accounting for plan amendments, curtailments and settlements. These amendments do not have any significant impact on the Group's consolidated financial statements.

IFRIC Interpretation 23 Uncertainty over Income Tax Treatment

IFRIC 23 clarifies the application of IAS 12 to accounting for income tax treatments that have yet to be accepted by tax authorities, in scenarios where it may be unclear how tax law applies to a particular transaction or circumstance, or whether a taxation authority will accept an entity's tax treatment. This interpretation does not have any significant impact on the Group's consolidated financial statements.

Annual Improvements to IFRS Standards 2015-2017 Cycle

Effective 1 January 2019, the Group adopted Annual Improvements to IFRS Standards 2015–2017 Cycle, which resulted in amendments to IFRS 3, Business Combinations, IFRS 11, Joint Arrangements, IAS 12, Income Taxes, and IAS 23, Borrowing Costs. These improvements do not have any impact on the Group's consolidated financial statements.

2.4 Standards issued but not yet effective

Certain new standards, amendments to standards and interpretations are not yet effective for the year ended 31 December 2019, with the Group not opting for early adoption. These have therefore not been applied in preparing these consolidated financial statements. The most significant of these new standards, amendments and interpretations are as follows:

Amendments to IFRS 3: Definition of a Business

In October 2018, the IASB issued amendments to the definition of a business in IFRS 3 Business Combinations to help entities determine whether an acquired set of activities and assets is a business or not. They clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess whether an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test.

Since the amendments apply prospectively to transactions or other events that occur on or after the date of first application, the Group will not be affected by these amendments on the date of transition.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.4 Standards issued but not yet effective (continued)

Amendments to IAS 1 and IAS 8: Definition of Material

In October 2018, the IASB issued amendments to IAS I Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to align the definition of 'material' across the standards and to clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.

Amendments to IFRS 9, IAS 39 and IFRS 7: Interest Rate Benchmark Reform

On 26 September 2019 the International Accounting Standards Board (IASB or the Board) published 'Interest Rate Benchmark Reform, Amendments to IFRS 9, IAS 39 and IFRS 7' (the "amendments"). This concludes phase one of the IASB's work to respond to the effects of Interbank Offered Rates (IBOR) reform on financial reporting. The amendments provide temporary reliefs which enable hedge accounting to continue during the period of uncertainty before the replacement of an existing interest rate benchmark with an alternative nearly risk-free interest rate (an "RFR"). The effective date of the amendments is for annual periods beginning on or after 1 January 2020, with early application permitted. These amendments do not have any significant impact on the Group's consolidated financial statements.

2.5 Summary of significant accounting policies

Business combinations and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the Group measures the non-controlling interest in the acquiree at the proportionate share of the acquiree's identifiable net assets. Acquisition costs incurred are expensed and included in administrative expenses.

When the Group makes an acquisition meeting the definition of a business under IFRS 3, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through the consolidated income statement. It is then considered in the determination of goodwill.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as equity is not remeasured until it is finally settled within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 Financial Instruments, is measured at fair value with the changes in fair value recognised in the statement of profit or loss in accordance with IFRS 9. Other contingent consideration that is not within the scope of IFRS 9 is measured at fair value at each reporting date with changes in fair value recognised in profit or loss.

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date. If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Business combinations and Goodwill (continued)

Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment annually, or more frequently, if events or changes in circumstances indicate that the carrying value may be impaired. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating units (CGUs) or group of CGUs, which are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units. Each unit to which the goodwill is allocated represents the lowest level within the Group at which the goodwill is monitored for internal management purposes, and is not larger than an operating segment in accordance with IFRS 8 "Operating segments".

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Foreign currencies

The consolidated financial statements are presented in Lebanese Lira (LL) which is the Group's presentation currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. The Group uses the direct method of consolidation.

(i) Transactions and balances

Transactions in foreign currencies are initially recorded at the functional currency rate of exchange ruling at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange at the date of the statement of financial position. All differences are taken to "Net (loss) gain from financial assets at fair value through profit or loss" in the consolidated income statement, except for monetary items that are designated as part of the hedge of the Group's net investment in a foreign operation. These are recognized in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss. Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gain or loss arising on retranslation of non-monetary items is treated in line with the recognition of gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss are recognized in other comprehensive income or profit or loss is also recognized in other comprehensive income or profit or loss respectively).

(ii) Group companies

On consolidation, the assets and liabilities of subsidiaries and overseas branches are translated into the Bank's presentation currency at the rate of exchange as at the reporting date, and their income statements are translated at the weighted average exchange rates for the year. Exchange differences arising on translation are recognized in OCI. On disposal of a foreign entity, the deferred cumulative amount recognized in OCI relating to that particular foreign operation is recognized in the consolidated income statement.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operations and translated at the exchange rate on the reporting date.

Financial instruments - initial recognition

(i) Date of recognition

All financial assets and liabilities are initially recognized on the settlement date. This includes "regular way trades": purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place.

(ii) Initial measurement of financial instruments

Financial instruments are initially measured at their fair value, plus or minus, in the case of a financial instrument not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial instrument. In the case of a financial instrument measured at fair value, with the change in fair value being recognized in profit or loss, the transaction costs are recognized as revenue or expense when the instrument is initially recognized.

When the fair value of financial instruments at initial recognition differs from the transaction price, the Group accounts for the Day 1 profit or loss, as described below.

(iii) Day 1 profit or loss

When the transaction price differs from the fair value at origination and the fair value is based on a valuation technique using only observable inputs in market transactions, the Group immediately recognizes the difference between the transaction price and fair value (a "Day 1" profit or loss) in the consolidated income statement. In cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognized in the consolidated income statement when the inputs become observable, or when the instrument is derecognized.

Financial assets - classification and measurement

On initial recognition, financial assets are classified as measured at: amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of two criteria:

- (i) The business model within which financial assets are measured; and
- (ii) Their contractual cash flow characteristics (whether the cash flows represent "solely payments of principal and interest" (SPPI)).

Financial assets are measured at amortized cost if they are held within a business model whose objective is to hold assets to collect contractual cash flows, and their contractual cash flows represent SPPI.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Financial assets - classification and measurement (continued)

Financial assets are measured at fair value through other comprehensive income if they are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and their contractual cash flows represent SPPI.

All other financial assets are classified as measured at fair value through profit or loss.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in fair value in other comprehensive income. This election is made on an investment-by-investment basis.

On initial recognition, the Group may irrevocably designate a financial asset as measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as an "accounting mismatch") that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases. The Group is required to disclose such financial assets separately from those mandatorily measured at fair value.

Business model

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective. Generally, a business model is a matter of fact which can be evidenced by the way business is managed and the information provided to Management.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account.

The Group's business model can be to hold financial assets to collect contractual cash flows even when sales of financial assets occur. However, if more than an infrequent number of sales are made out of a portfolio, the Group needs to assess whether and how such sales are consistent with an objective of collecting contractual cash flows. If the objective of the Group's business model for managing those financial assets changes, the Group is required to reclassify financial assets.

The SPPI test

As a second step of its classification process the Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortization of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Financial assets - classification and measurement (continued)

The SPPI test (continued)

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at fair value though profit and loss.

Financial assets at amortized cost

Balances with central banks, Due from banks and financial institutions, Loans to banks and financial institutions, Net loans and advances to customers and related parties at amortized cost and Financial assets at amortized cost. These financial assets are initially recognized at cost, being the fair value of the consideration paid for the acquisition of the investment. All transaction costs directly attributed to the acquisition are also included in the cost of investment. After initial measurement, these are subsequently measured at amortized cost using the EIR, less expected credit losses. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the EIR. The amortization is included in "interest and similar income" in the consolidated income statement. The losses arising from impairment are recognized in the consolidated income statement in "Net impairment loss on financial assets". Gains and losses arising from the derecognition of financial assets measured at amortized cost are reflected under "Net gain (loss) from derecognition of financial assets at amortized cost" in the consolidated income statement.

Financial assets at fair value through other comprehensive income

These financial assets are initially recognized at cost, being the fair value of the consideration paid for the acquisition of the investment. All transaction costs directly attributed to the acquisition are also included in the cost of investment. After initial measurement, these are subsequently measured at fair value with gains and losses arising due to changes in fair value recognized in other comprehensive income. Interest income and foreign exchange gains and losses are recognized in profit or loss in the same manner as for financial assets measured at amortized cost. The ECL calculation for debt instruments at fair value through other comprehensive income is explained below. On derecognition, cumulative gains or losses previously recognized in other comprehensive income are reclassified from other comprehensive income to profit or loss.

Equity instruments at fair value through other comprehensive income

Upon initial recognition, the Group can elect to classify irrevocably some of its investments in equity instruments at fair value through other comprehensive income when they are not held for trading. Such classification is determined on an instrument-by-instrument basis.

These financial assets are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value, with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated under equity. The cumulative gain or loss will not be reclassified to the consolidated income statement on disposal of the investments. Equity instruments at fair value through other comprehensive income are not subject to an impairment assessment.

Dividends on these investments are recognised under "Revenue from financial assets at fair value through other comprehensive income" in the consolidated income statement when the Group's right to receive payment of dividend is established in accordance with IFRS 15: "Revenue from contracts with customers", unless the dividends clearly represent a recovery of part of the cost of the investment. Equity instruments at fair value through other comprehensive income are not subject to an impairment assessment.

Financial assets at fair value through profit or loss

Included in this category are those debt instruments that do not meet the conditions in "financial assets at amortized cost" and "financial assets at fair value through other comprehensive income" above, debt instruments designated at fair value through profit or loss upon initial recognition, and equity instruments at fair value through profit or loss. Management only designates a financial asset at fair value through profit and loss upon initial recognition when the designation eliminates, significantly reduces, the inconsistent treatment that would otherwise arise from measuring assets or recognizing gains and losses on them on a different basis.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Financial assets - classification and measurement (continued)

Financial assets at fair value through profit or loss (continued)

Debt instruments at fair value through profit or loss

These financial assets are recorded in the consolidated statement of financial position at fair value. Transaction costs directly attributable to the acquisition of the instrument are recognized as revenue or expense when the instrument is initially recognized. Changes in fair value and interest income are recorded under "Net (loss) gain from financial assets at fair value through profit or loss" in the consolidated income statement. Gains and losses arising from the derecognition of debt instruments and other financial assets at fair value through profit or loss are also reflected under "Net (loss) gain from financial assets at fair value through profit or loss" in the consolidated income statement, showing separately those related to financial assets designated at fair value upon initial recognition from those mandatorily measured at fair value.

Equity instruments at fair value through profit or loss

Investments in equity instruments are classified at fair value through profit or loss, unless the Group designates at initial recognition an investment that is not held for trading as at fair value through other comprehensive income. These financial assets are recorded in the consolidated statement of financial position at fair value.

Changes in fair value and dividend income are recorded under "Net gain on financial assets at fair value through profit or loss" in the consolidated income statement. Gains and losses arising from the derecognition of equity instruments at fair value through profit or loss are also reflected under "Net (loss) gain from financial assets at fair value through profit or loss" in the consolidated income statement.

Financial liabilities (other than financial guarantees, letters of credit and loan commitments) - classification and measurement

Liabilities are initially measured at fair value plus, in the case of a financial liability not at fair value through profit or loss, particular transaction costs. Liabilities are subsequently measured at amortized cost or fair value.

The Group classifies all financial liabilities as subsequently measured at amortized cost using the effective interest rate method, except for:

- Financial liabilities at fair value through profit or loss (including derivatives);
- Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies; and
- Contingent consideration recognized in a business combination in accordance with IFRS 3.

The Group may, at initial recognition, irrevocably designate a financial liability as measured at fair value through profit or loss when:

- Doing so results in more relevant information, because it either eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as "an accounting mismatch") that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases; or
- A group of financial liabilities or financial assets and financial liabilities is managed and its performance is
 evaluated on a fair value basis, in accordance with a documented risk management or investment strategy,
 and information about the group is provided internally on that basis to the Group's Key Management
 Personnel; or
- A group of financial liabilities contains one or more embedded derivatives, unless they do not significantly modify the cash flows that would otherwise be required by contract, or it is clear with little or no analysis when a similar instruments is first considered that separation of the embedded derivatives is prohibited.

Financial liabilities at fair value though profit and loss are recorded in the consolidated statement of financial position at fair value. Changes in fair value are recorded in profit and loss with the exception of movements in fair value of liabilities designated at fair value though profit and loss due to changes in the Group's own credit risk. Such changes in fair value are recognized in other comprehensive income, unless such recognition would create an accounting mismatch in the consolidated income statement.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Financial liabilities (other than financial guarantees, letters of credit and loan commitments) - classification and measurement (continued)

Changes in fair value attributable to changes in credit risk do not get recycled to the consolidated income statement.

Interest incurred on financial liabilities designated at fair value through profit and loss is accrued in interest expense using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument.

Debt issued and other borrowed funds

Financial instruments issued by the Group, which are not designated at fair value through profit or loss, are classified under "Debt issued and other borrowed funds" where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

After initial measurement, debt issued and other borrowings are subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the effective interest rate method.

A compound financial instrument which contains both a liability and an equity component is separated at the issue date. A portion of the net proceeds of the instrument is allocated to the debt component on the date of issue based on its fair value (which is generally determined based on the quoted market prices for similar debt instruments). The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the debt component. The value of any derivative features (such as a call option) embedded in the compound financial instrument other than the equity component is included in the debt component.

Due to central banks, Banks and financial institutions, Repurchase agreements and Customers' and related parties' deposits

After initial measurement, due to central banks, banks and financial institutions, and customers' and related parties' deposits are measured at amortized cost less amounts repaid using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the effective interest rate method. Customer deposits which are linked to the performance of indices or commodities are subsequently measured at fair value through profit or loss.

Derivatives recorded at fair value through profit or loss

A derivative is a financial instrument or other contract with all three of the following characteristics:

- a) Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (aka the "underlying").
- b) It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- c) It is settled at a future date.

The Group enters into derivative transactions with various counterparties. These include interest rate swaps, forward foreign exchange contracts, equity swaps and options and currency options.

Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. The notional amount and fair value of such derivatives are disclosed separately in the notes. Changes in the fair value of derivatives are recognized in "Net (loss) gain from financial assets at fair value through profit or loss" in the consolidated income statement, unless hedge accounting is applied, which is discussed in under "hedge accounting policy" below.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Embedded derivatives

An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract. A derivative that is attached to a financial instrument, but is contractually transferable independently of that instrument, or has a different counterparty from that instrument, is not an embedded derivative, but a consolidated financial instrument.

An embedded derivative is separated from the host and accounted for as a derivative if, and only if:

- (a) The hybrid contract contains a host that is not an asset within the scope of IFRS 9;
- (b) The economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host;
- (c) A separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- (d) The hybrid contract is not measured at fair value with changes in fair value recognized in profit or loss.

Financial guarantees, letters of credit and undrawn loan commitments

Financial guarantees are initially recognized in the consolidated financial statements at fair value, being the premium received. Subsequent to initial recognition, the Group's liability under each guarantee is measured at the higher of the amount initially recognized less cumulative amortization recognized in the consolidated income statement, and an ECL provision. The premium received is recognized in the income statement in "Net fees and commission income" on a straight line basis over the life of the guarantee.

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Group is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, these contracts are in the scope of ECL requirements.

The nominal contractual value of financial guarantees, letters of credit and undrawn loan commitments are not recorded in the statement of financial position. The nominal values of these instruments together with the corresponding ECLs are disclosed in the notes.

Reclassification of financial assets

The Group reclassifies financial assets if the objective of the business model for managing those financial assets changes. Such changes are expected to be very infrequent and are determined by the Group's Senior Management as a result of external or internal changes when significant to the Group's operations and demonstrable to external parties.

If financial assets are reclassified, the reclassification is applied prospectively from the reclassification date, which is the first day of the first reporting period following the change in business model that results in the reclassification of financial assets. Any previously recognized gains, losses or interest are not restated.

If a financial asset is reclassified so that it is measured at fair value, its fair value is determined at the reclassification date. Any gain or loss arising from a difference between the previous carrying amount and fair value is recognized in profit or loss. If a financial asset is reclassified so that it is measured at amortized cost, its fair value at the reclassification date becomes its new carrying amount.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Derecognition of financial assets and financial liabilities

Financial assets

(i) Derecognition due to substantial modification of terms and conditions

If the terms of a financial asset are modified, then the Group evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognized and a new financial asset is recognized at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit or loss as part of the gain or loss on derecognition.

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximize recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Group plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place (see below).

If the modification of a financial asset measured at amortized cost or fair value through other comprehensive income does not result in derecognition of the financial asset, then the Group first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognizes the resulting adjustment as a modification gain or loss in profit or loss. For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortized over the remaining term of the modified financial asset.

If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment loss. In other cases, it is presented as interest income calculated using the effective interest rate method.

(ii) Derecognition other than for substantial modification

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when the rights to receive cash flows from the financial asset have expired. The Group also derecognizes the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Group has transferred the financial asset if, and only if, either:

- > The Group has transferred its contractual rights to receive cash flows from the financial asset; or
- The Group retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement.

Pass-through arrangements are transactions whereby the Group retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- > The Group has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates;
- > The Group cannot sell or pledge the original asset other than as security to the eventual recipients; and
- > The Group has to remit any cash flows it collects on behalf of the eventual recipients without material delay. In addition, the Group is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Derecognition of financial assets and financial liabilities (continued)

Financial assets (continued)

(ii) Derecognition other than for substantial modification (continued)

A transfer only qualifies for derecognition if either:

- > The Group has transferred substantially all the risks and rewards of the asset; or
- > The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

The Group considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Group has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognized only to the extent of the Group's continuing involvement, in which case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Group could be required to pay.

If continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the continuing involvement is measured at the value the Group would be required to pay upon repurchase. In the case of a written put option on an asset that is measured at fair value, the extent of the entity's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognized in the consolidated income statement, as "other operating income" or "other operating expenses".

If the modification of a financial liability is not accounted for as derecognition, then the amortized cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognized in profit or loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognized as an adjustment to the carrying amount of the liability and amortized over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

Repurchase and reverse repurchase agreements

Securities sold under agreements to repurchase at a specified future date are not derecognized from the consolidated statement of financial position as the Group retains substantially all the risks and rewards of ownership. The corresponding consideration received (cash collateral provided) is recognized in the consolidated statement of financial position as an asset with a corresponding obligation to return it, including accrued interest as a liability within "Repurchase agreements", reflecting the transaction's economic substances as a loan to the Group. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of the agreement using the EIR. When the counterparty has the right to sell or repledge the securities, the Group reclassifies those securities in its statement of financial position to "Financial assets at fair value through profit or loss pledged as collateral" as appropriate.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Repurchase and reverse repurchase agreements (continued)

Conversely, securities purchased under agreements to resell at a specified future date are not recognized in the consolidated statement of financial position. The consideration paid (cash collateral provided), including accrued interest is recorded in the statement of financial position, reflecting the transaction's economic substance as a loan by the Group. The difference between the purchase and resale prices is recorded in "Net interest income" and is accrued over the life of the agreement using the EIR.

If securities purchased under agreement to resell are subsequently sold to third parties, the obligation to return the securities is recorded as a short sale within "Financial liabilities at fair value through profit or loss" and measured at fair value with any gains or losses included in "Net (loss) gain from financial assets at fair value through profit or loss" in the consolidated income statement.

Impairment of financial assets

(i) Overview of the ECL principles

The Group records allowance for expected credit losses for all loans and other financial assets not held at fair value through profit or loss, together with loan commitments and financial guarantee contracts, in this section all referred to as "financial instruments". Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss), unless there has been no significant increase in credit risk since origination, in which cases, the allowance is based on the 12 months' expected credit loss (12mECL). The 12mECL is the portion of lifetime ECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

(ii) Measurement of ECLs

The Group measures ECLs based on three probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR as follows:

- Financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive);
- > Financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- > Undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn down and the cash flows that the Group expects to receive; and
- Financial guarantee contracts: the expected payments to reimburse the holder less any amount that the Group expects to recover.

The key inputs into the measurements of ECL are:

- ➤ PD: The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognized and is still in the portfolio.
- > EAD: The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, and expected drawdowns on committed facilities.
- ➤ LGD: The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the Group would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

These parameters are generally derived from statistical models and other historical data. Forward looking information is incorporated in ECL measurements.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Impairment of financial assets (continued)

(ii) Measurement of ECLs (continued)

The Group measures ECLs using a three-stage approach based on the extent of credit deterioration since origination:

- > Stage 1 Where there has not been a significant increase in credit risk (SICR) since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default occurring over the next 12 months. For these instruments with a remaining maturity of less than 12 months, probability of default corresponding to remaining term to maturity is used.
- ➤ Stage 2 When a financial instrument experiences a SICR subsequent to origination but is not considered to be impaired, it is included in Stage 2. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
- ➤ Stage 3 Financial instruments that are considered to be impaired are included in this stage, the allowance for credit losses captures the lifetime expected credit losses, similar to Stage 2.

(lli) Forborne and modified loans

The Group sometimes makes concessions or modifications to the original terms of loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. The Group considers a loan forborne when such concessions or modifications are provided as a result of the borrower's present or expected financial difficulties and the Group would not have agreed to them if the borrower had been financially healthy. Indicators of financial difficulties include defaults on covenants, or significant concerns raised by the Credit Risk Department. Forbearance may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms. It is the Group's policy to monitor forborne loans to help ensure that future payments continue to be likely to occur. Derecognition decisions and classification between Stage 2 and Stage 3 are determined on a case-by-case basis. If these procedures identify a loss in relation to a loan, it is disclosed and managed as an impaired Stage 3 forborne asset until it is collected or written off.

When the loan has been renegotiated or modified but not derecognized, the Group also reassesses whether there has been a significant increase in credit risk. The Group also considers whether the assets should be classified as Stage 3. Once an asset has been classified as forborne, it will remain forborne for a minimum 12-month probation period. In order for the loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- At least a 12-month probation period has passed,
- Three consecutive payments under the new repayment schedule have been made,
- The borrower has no past dues under any obligation to the Group,
- All the terms and conditions agreed to as part of the restructuring have been met.

If modifications are substantial, the loan is derecognized, as explained above.

(iv) Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortized cost and debt financial assets carried at fair value through other comprehensive income are credit-impaired (referred to as "Stage 3 financial assets"). A financial asset is "credit impaired" when one or more events that have detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired includes the following observable information:

- Significant financial difficulty of the borrower or issuer;
- A breach of contract such as a default or past due event;
- The restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise:
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- The disappearance of an active market for a security because of financial difficulties.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Impairment of financial assets (continued)

(v) Write offs

Financial assets are written off either partially or in their entirety only when the Group has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to "Net impairment loss on financial assets".

(vi) Debt instruments at fair value through other comprehensive income

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortized cost is recognized in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognized in OCI is recycled to the profit and loss upon derecognition of the assets.

(vii) Collateral repossessed

The Group occasionally acquires properties in settlement of loans and advances. Upon initial recognition, those assets are measured at fair value as approved by the regulatory authorities. Subsequently, these properties are measured at the lower of carrying value or net realizable value.

Upon sale of repossessed assets, any gain or loss realized is recognized in the consolidated income statement under "other operating income" or "other operating expenses". Gains resulting from the sale of repossessed assets are transferred to "Reserve appropriated for increase of share capital" in the following financial year.

Fair value measurement

The Group measures financial instruments, such as, derivatives, financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income, at fair value at each consolidated statement of financial position date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed, are summarized in the notes.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- > In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Fair value measurement (continued)

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ► Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- > Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's management determines the policies and procedures for both recurring and non-recurring fair value measurement. At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Hedge accounting

In order to manage particular risks, the Group applies hedge accounting for transactions which meet the specified criteria. The Group makes use of derivative instruments to manage exposures to foreign currency risk and interest rate fluctuations. The process starts with identifying the hedging instrument and hedged item and preparing hedge documentation detailing the risk management strategy and objective.

Setting the risk management strategy and objectives

At inception of the hedge relationship, the Group formally documents the relationship between the hedged item and the hedging instrument, including the nature of the risk, the objective and strategy for undertaking the hedge, and the method that will be used to assess the effectiveness of the hedging relationship.

The risk management strategy is established at the level of Board risk management committee and identifies the risks to which the Group is exposed and whether and how the risk management activities should address those risks. The strategy is typically maintained for a relatively long period of time. However, it may include some flexibility to react to changes in circumstances. The risk management strategy is set out in general documentation and is cascaded down through policies containing more specific guidelines.

The Group sets risk management objectives at the level of individual hedging relationships and defines how a particular hedging instrument is designated to hedge a particular hedged item. As such, a risk management strategy would usually be supported by many risk management objectives.

Qualifying hedging relationships

The Group applies hedge accounting for qualifying hedging relationships. A hedging relationship qualifies for hedge accounting only if: (a) the hedging relationship consists only of eligible hedging instruments and eligible hedged items; (b) at the inception of the hedging relationship there is formal designation and documentation of the hedging relationship and the Group's risk management objective and strategy for undertaking the hedge; and (c) the hedging relationship meets all of the hedge effectiveness requirements.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Hedge accounting (continued)

Qualifying hedging relationships (continued)

At each hedge effectiveness assessment date, a hedge relationship must be expected to be highly effective on a prospective basis in order to qualify for hedge accounting. The effectiveness test can be performed qualitatively or quantitatively. A formal assessment is undertaken to ensure the hedging instrument is expected to be highly effective in offsetting the designated risk in the hedged item, both at inception and at each quarter on an ongoing basis.

A hedge is expected to be highly effective if:

- There is an economic relationship between the hedged item and the hedging instrument;
- The effect of credit risk does not dominate the value changes that result from that economic relationship; and
- > The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the entity actually hedges and the quantity of the hedging instrument that the entity actually uses to hedge that quantity of hedged item. However, that designation shall not reflect an imbalance between the weightings of the hedged item and the hedging instrument that would create hedge ineffectiveness that could result in an accounting outcome that would be inconsistent with the purpose of hedge accounting.

Hedge ineffectiveness is recognised in the consolidated income statement in "net gain on financial assets at fair value through profit or loss".

When a Group separates the intrinsic value and time value of an option contract and designates as the hedging instrument only the change in intrinsic value of the option, it shall account for the time value of the option as follows:

- (a) An entity shall distinguish the time value of options by the type of hedged item that the option hedges:
 - (i) A transaction related hedged item; or
 - (ii) A time-period related hedged item.
- (b) The change in fair value of the time value shall be recognised in other comprehensive income to the extent that it relates to the hedged item and shall be accounted in a separate component of equity. The cumulative change in fair value shall be accounted for as follows:
 - (i) If the hedged item subsequently results in the recognition of a non-financial asset or a non-financial liability, or a firm commitment for a non-financial asset or a non-financial liability for which fair value hedge accounting is applied, the entity shall remove the amount from the separate component of equity and include it directly in the initial cost or other carrying amount of the asset or the liability. This is not a reclassification adjustment and hence does not affect other comprehensive income;
 - (ii) For hedging relationships other than those covered by (i), the amount shall be reclassified from the separate component of equity to profit or loss as a reclassification adjustment in the same period or periods during which the hedged expected future cash flows affect profit or loss;
 - (iii) However, if all or a portion of that amount is not expected to be recovered in one or more future periods, the amount that is not expected to be recovered shall be immediately reclassified into profit or loss as a reclassification adjustment.
- (c) The change in fair value of the time value of an option that hedges a time-period related hedged item shall be amortised on a systematic and rational basis over the period during which the hedge adjustment for the option's intrinsic value could affect profit or loss (or other comprehensive income, if the hedged item is an equity instrument for which an entity has elected to present changes in fair value in other comprehensive income). However, if hedge accounting is discontinued for the hedging relationship that includes the change in intrinsic value of the option as the hedging instrument, the net amount (i.e. including cumulative amortisation) that has been accumulated in the separate component of equity shall be immediately reclassified into profit or loss as a reclassification adjustment (see IAS 1).

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Hedge accounting (continued)

Qualifying hedging relationships (continued)

When a Group separates the forward element and the spot element of a forward contract and designates as the hedging instrument only the change in the value of the spot element of the forward contract, or when an entity separates the foreign currency basis spread from a financial instrument and excludes it from the designation of that financial instrument as the hedging instrument, the entity may account for the forward element of the forward contract or for the foreign currency basis spread in the same manner as for the time value of an option.

(i) Fair value hedges

For qualifying fair value hedges, the gain or loss on the hedging instrument is recognized in the consolidated income statement under "Net (loss) gain from financial assets at fair value through profit or loss". Hedging gain or loss on the hedged item adjusts the carrying amount of the hedged item and is recognized in the consolidated income statement also under "Net (loss) gain from financial assets at fair value through profit or loss".

If the hedging instrument expires or is sold, terminated or exercised, or when the hedge no longer meets the criteria for hedge accounting, or the Group decides to voluntarily discontinue the hedging relationship, the hedge relationship is discontinued prospectively. If the relationship does not meet the hedge effectiveness criteria, the Group discontinues hedge accounting from the last date on which compliance with hedge effectiveness was demonstrated.

If the hedge accounting relationship is terminated for an item recorded at amortised cost, the accumulated fair value hedge adjustment to the carrying amount of the hedged item is amortised over the remaining term of the original hedge by recalculating the EIR. If the hedged item is derecognised, the unamortised fair value adjustment is recognised immediately in the consolidated income statement.

For fair value hedge relationships where the hedged item is not measured at amortised cost, such as debt instruments at fair value through other comprehensive income, changes in fair value that were recorded in the consolidated income statement whilst hedge accounting was in place are amortised in a similar way to amortised cost instruments using the EIR method. However, as these instruments are measured at their fair values in the consolidated statement of financial position, the fair value hedge adjustments are transferred from the consolidated income statement to other comprehensive income.

(ii) Cash flow hedges

For qualifying cash flow hedges, a consolidated component of equity associated with the hedged item (cash flow hedge reserve) is adjusted to the lower of the following (in absolute amounts):

- a) The cumulative gain or loss on the hedging instrument from inception of the hedge; and
- b) The cumulative change in fair value (present value) of the hedged item from inception of the hedge.

The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge (the portion that is offset by the change in the cash flow hedge reserve described above) shall be recognized in other comprehensive income. Any remaining gain or loss on the hedging instrument is hedge ineffectiveness that shall be recognized in the consolidated income statement. The amount that has been accumulated in the cash flow hedge reserve and associated with the hedged item is treated as follows:

- a) If a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, the Group removes that amount from the cash flow hedge reserve and includes it directly in the initial cost or other carrying amount of the asset or the liability without affecting other comprehensive income.
- b) For cash flow hedges other than those covered by a), that amount is reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment in the same period or periods during which the hedged expected future cash flows affect profit or loss. However, if that amount is a loss and the Group expects that all or a portion of that loss will not be recovered in one or more future periods, it immediately reclassifies the amount that is not expected to be recovered into profit or loss as a reclassification adjustment.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Qualifying hedging relationships (continued)

(ii) Cash flow hedges (continued)

When a hedging instrument expires, is sold, terminated, exercised, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss that has been recognised in other comprehensive income at that time remains in other comprehensive income and is recognised when the hedged forecast transaction is ultimately recognised in the consolidated income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in other comprehensive income is immediately transferred to the consolidated income statement.

(iii) Hedge of net investments

Hedges of net investments in a foreign operation, including a hedge of a monetary item that is accounted for as part of the net investment, are accounted for in a way similar to cash flow hedges. Gains or losses on the hedging instrument relating to the effective portion of the hedge are recognized directly in other comprehensive income while any gains or losses relating to the ineffective portion are recognized in the income statement. On disposal or partial disposal of the foreign operation, the cumulative value of any such gains or losses recognized directly in the foreign currency translation reserve is transferred to the consolidated income statement as a reclassification adjustment.

Leases (Policy applicable from 1 January 2019)

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(i) Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment loss, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

The right-of-use assets are presented within "Property, equipment and right-of-use assets" on the consolidated financial statements and are subject to impairment in line with the Group's policy as described under Impairment of non-financial assets.

Depreciation charge for right-of-use assets presented within "Depreciation of property, equipment and right-of-use assets" on the consolidated financial statements.

(ii) Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including insubstance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Leases (Policy applicable from 1 January 2019) (continued)

Group as a lessee (continued)

(ii) Lease liabilities (continued)

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

The Group's lease liabilities are included under "other liabilities". Moreover, the interest charge on lease liabilities is presented within "interest and similar expenses" from financial instruments measured at amortized cost in consolidated financial statements.

(iii) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the lease of low-value assets recognition exemption to leases that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Other rental expenses (including non-lease components paid to landlords) presented within other operating expenses.

Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases (Policy applicable before 1 January 2019)

The determination of whether an arrangement is a lease or it contains a lease, is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Group as a lessee

Leases which do not transfer to the Group substantially all the risks and benefits incidental to ownership of the leased items are operating leases. Operating lease payments are recognized as an expense in the income statement on a straight line basis over the lease term. Contingent rental payables are recognized as an expense in the period in which they are incurred.

Group as a lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Revenue recognition (continued)

(i) Interest and similar income and expense

The effective interest rate

Interest income and expense are recognized in the income statement applying the EIR method for all financial instruments measured at amortised cost, financial instruments designated at fair value through profit or loss and interest bearing financial assets measured at fair value through other comprehensive income.

The EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortised cost of a financial liability. When calculating the EIR for financial instruments other than purchased or originated credit impaired, an entity shall take into account all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but shall not consider the expected credit losses. For purchased or originated credit impaired financial assets, a credit adjusted effective interest rate is calculated using estimated future cash flows and expected credit losses.

The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Interest income and interest expense

The effective interest rate of a financial asset or a financial liability is calculated on initial recognition of the financial asset or financial liability. In determining interest income and expense, the EIR is applied to the gross carrying amount of the financial asset (unless the asset is credit-impaired) or the amortized cost of a financial liability. The effective interest rate is revised as a result of periodic re-estimation of cash flows of floating rate instruments to reflect movements in market rates of interest. The effective interest rate is also revised for fair value hedge adjustments at the date amortization of the hedge adjustment begins.

The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts, unless the financial instrument is measured at fair value, with the change in fair value being recognized in profit or loss. In those cases, the fees are recognized as revenue or expense when the instrument is initially recognized.

When a financial asset becomes credit-impaired after initial recognition, interest income is determined by applying EIR to the net amortized cost of the instrument. If the financial asset cures and is no longer credit-impaired, the Group reverts back to calculating interest income on a gross basis. Furthermore, for financial assets that were credit-impaired on initial recognition, interest is determined by applying a credit-adjusted EIR to the amortized cost of the instrument. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

Presentation

Interest income on financial assets at amortized cost calculated using the effective interest method is presented in the consolidated income statement under "Interest and similar income". Interest expense on financial assets at amortized cost is presented in the consolidated income statement under "Interest and similar expense".

Interest income and expense on financial instruments measured at fair value through profit or loss are presented under "Net gain (loss) from financial assets at fair value through profit or loss" in the consolidated income statement.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Revenue recognition (continued)

(ii) Fee and commission income

The Group earns fee and commission income from a diverse range of services it provides to its customers. Fee income can be divided into the following two categories:

Fee income earned from services that are provided over a certain period of time

Fees earned for the provision of services over a period of time are accrued over that period. These fees include commission income and asset management, custody and other management and advisory fees.

Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognized as an adjustment to the EIR on the loan. When it is unlikely that a loan be drawn down, the loan commitment fees are recognized as revenues on expiry.

Fee income from providing transaction services

Fee arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses, are recognized on completion of the underlying transaction. Fee or components of fee that are linked to a certain performance are recognized after fulfilling the corresponding criteria.

(iii) Dividend income

Dividend income is recognized when the right to receive the payment is established.

(iv) Net gain from financial instruments at fair value through profit or loss

Net income from financial instruments at fair value through profit or loss comprises gains and losses related to trading assets and liabilities, non-trading derivatives held for risk management purposes that do not form part of qualifying hedging relationships, financial assets and financial liabilities designated as at fair value through profit or loss and, also non-trading assets mandatorily measured at fair value through profit or loss. The line item includes fair value changes, interest, dividends and foreign exchange differences.

(v) Insurance revenue

For the insurance subsidiaries, net premiums and accessories (gross premiums) are taken to income over the terms of the policies to which they relate using the prorate temporize method for non-marine business and 25% of gross premiums for marine business. Unearned premiums reserve represents the portion of the gross premiums written relating to the unexpired period of coverage. If the unearned premiums reserve is not considered adequate to cover future claims arising on these premiums a premium deficiency reserve is created.

Cash and cash equivalents

"Cash and cash equivalents" as referred to in the cash flow statement comprises balances with original maturities of a period of three months or less including cash and balances with the central banks, deposits with banks and financial institutions, due to central banks, repurchase agreements and due to banks and financial institutions.

Property and equipment

Property and equipment is stated at cost excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value. Such cost includes the cost of replacing part of the property and equipment if the recognition criteria are met. When significant parts of property and equipment are required to be replaced at intervals, the Group recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in the consolidated income statement as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

Changes in the expected useful life are accounted for by changing the depreciation period or method, as appropriate and treated as changes in accounting estimates.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Property and equipment (continued)

Depreciation is calculated using the straight line method to write down the cost of property and equipment to their residual values over their estimated useful lives. Land is not depreciated. The estimated useful lives are as follows:

Buildings 50 years
Furniture, office installations and computer equipment (2–16.67) years
Vehicles 6.67 years

Any item of property and equipment and any significant part initially recognized are is derecognized on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated income statement when the asset is derecognized.

The asset's residual lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively if applicable.

Intangible assets

An intangible asset is recognized only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Group.

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment loss.

The useful lives of intangible assets are assessed to be either finite of indefinite. Intangible assets with finite lives are amortized over the useful economic life. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the consolidated income statement.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated income statement when the asset is derecognized.

The Group does not have intangible assets with indefinite economic life.

Amortization is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

Key money lower of lease period or 5 years

Computer software 2.5 years

Non-current assets held for sale

Non-current assets held for sale are measured at the lower of their carrying amount and fair value less costs to scil. Non-current assets are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition, management has committed to the sale, and the sale is expected to have been completed within one year from the date of classification.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS At 31 December 2019

2 ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment loss may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated income statement, unless the asset is carried at a revalued amount, in which case the reversal is treated as a revaluation increase.

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognized. Impairment loss relating to goodwill cannot be reversed in future periods.

Provisions for risks and charges

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to any provision is presented in the consolidated income statement net of any reimbursement.

The Group operates in a regulatory and legal environment that, by nature, has a heightened element of litigation risk inherent to its operations. As a result, it is involved in various litigation, arbitration and regulatory investigations and proceedings both in Lebanon and in other jurisdictions, arising in the ordinary course of the Group's business.

When the Group can reliably measure the outflow of economic benefits in relation to a specific case and considers such outflows to be probable, the Group records a provision against the case. Where the probability of outflow is considered to be remote, or probable, but a reliable estimate cannot be made, a contingent liability is disclosed. However, when the Group is of the opinion that disclosing these estimates on a case-by-case basis would prejudice their outcome, then the Group does not include detailed, case-specific disclosers in its consolidated financial statements.

Given the subjectivity and uncertainty of determining the probability and amount of losses, the Group takes into account a number of factors including legal advice, the stage of the matter and historical evidence from similar incidents. Significant judgement is required to conclude on these estimates.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Employees' retirement benefits obligation

For the Group and its subsidiaries operating in Lebanon, retirement benefits obligation subscriptions paid and due to the National Social Security Fund (NSSF) are calculated on the basis of 8.5% of the staff salaries. The final retirement benefits obligation due to employees after completing 20 years of service, at the retirement age, or if the employee permanently leaves employment, are calculated based on the last salary multiplied by the number of years of service. The Group is liable to pay to the NSSF the difference between the subscriptions paid and the final retirement benefits obligation due to employees. The Group provides for retirement benefits obligation on that basis.

Retirement benefits obligation for employees at foreign branches and subsidiaries are accrued for in accordance with the laws and regulations of the respective countries in which the branches and subsidiaries are located.

Taxes

Taxes are provided for in accordance with regulations and laws that are effective in the countries where the Group operates.

(i) Current tax

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income.

Current income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated income statement. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

(ii) Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries and associates, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial
 recognition of an asset or liability in a transaction that is not a business combination and, at the time of
 the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries and associates, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Taxes (continued)

(ii) Deferred tax (continued)

The carrying amount of deferred tax assets is reviewed at each consolidated statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each consolidated statement of financial position date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the consolidated statement of financial position date.

Current tax and deferred tax relating to items recognized directly in other comprehensive income are also recognized in other comprehensive income and not in the consolidated income statement.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognised subsequently if new information about facts and circumstances change. The adjustment is either treated as a reduction in goodwill (as long as it does not exceed goodwill) if it was incurred during the measurement period or recognised in profit or loss.

Treasury shares

Own equity instruments of the Group which are acquired by it or by any of its subsidiaries (treasury shares) are deducted from equity and accounted for at weighted average cost. Consideration paid or received on the purchase sale, issue or cancellation of the Group's own equity instruments is recognized directly in equity. No gain or loss is recognized in the consolidated income statement on the purchase, sale, issue or cancellation of the Group's own equity instruments.

When the Group holds own equity instruments on behalf of its clients, those holdings are not included in the Group's consolidated statement of financial position.

Contracts on own shares that require physical settlement of a fixed number of own shares for a fixed consideration are classified as equity and added to or deducted from equity. Contracts on own shares that require net cash settlement or provide a choice of settlement are classified as trading instruments and changes in the fair value are reported in the consolidated income statement.

Dividends on common shares

Dividends on common shares are recognized as a liability and deducted from equity when they are approved by the Group's shareholders. Interim dividends are deducted from equity when they are declared and no longer at the discretion of the Group. Dividends for the year that are approved after the reporting date are disclosed as an event after the reporting date.

Assets held in custody and under administration

The Group provides custody and administration services that result in the holding or investing of assets on behalf of its clients. Assets held in custody or under administration, are not treated as assets of the Group and accordingly are recorded as off-balance sheet items.

Customers' acceptances

Customers' acceptances represent term documentary credits which the Group has committed to settle on behalf of its clients against commitments by those clients (acceptances). The commitments resulting from these acceptances are stated as a liability in the consolidated statement of financial position for the same amount.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.5 Summary of significant accounting policies (continued)

Segment reporting

The Group's segmental reporting is based on the following operating segments: retail banking, corporate banking, treasury, money and capital markets and asset management and private banking.

2.6 Significant accounting estimates and judgements

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect in the amounts recognised in the consolidated financial statements:

Business model

In determining whether its business model for managing financial assets is to hold assets in order to collect contractual cash flows the Group considers:

- Management's stated policies and objectives for the portfolio and the operation of those policies in practice;
- How management evaluates the performance of the portfolio;
- Whether management's strategy focuses on earning contractual interest revenues;
- The degree of frequency of any expected asset sales;
- The reason for any asset sales; and
- Whether assets that are sold are held for an extended period of time relative to their contractual maturity.

Contractual cash flows of financial assets

The Group exercises judgement in determining whether the contractual terms of financial assets it originates or acquires give rise on specific dates to cash flows that are solely payments of principal and interest on the principal outstanding and so may qualify for amortized cost measurement. In making the assessment the Group considers all contractual terms, including any prepayment terms or provisions to extend the maturity of the assets, terms that change the amount and timing of cash flows and whether the contractual terms contain leverage.

Deferred tax assets

Deferred tax assets are recognized in respect of tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Judgement is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable profits, together with future tax planning strategies.

Going concern

Notwithstanding the events and conditions disclosed in note 1, these consolidated financial statements have been prepared based on the going concern assumption. The Board of Directors believes that they are taking all the measures available to maintain the viability of the Group and continue its operations in the current business and economic environment.

Impairment of goodwill

Management judgement is required in estimating the future cash flows of the CGUs. These values are sensitive to cash flows projected for the periods for which detailed forecasts are available, and to assumptions regarding the term sustainable pattern of cash flows thereafter. While the acceptable range within which underlying assumptions can be applied is governed by the requirement for resulting forecasts to be compared with actual performance and verifiable economic data in future years, the cash flow forecasts necessarily and appropriately reflect Management's view of future business prospects.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.6 Significant accounting estimates and judgements (continued)

Judgements (continued)

Hedge accounting

The Group's hedge accounting policies include an element of judgement and estimation. Estimates of future interest rates and the general economic environment will influence the availability and timing of suitable hedged items, with an impact on the effectiveness of the hedge relationships. Details of the Group's hedge accounting policies and the sensitivities most relevant to risks are disclosed in notes.

Determining the lease term of contracts with renewal and termination options

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include extension and termination options. The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., a change in business strategy).

The Group included the renewal period as part of the lease term for leases of head office and branches due to the significance of these assets to its operations. Furthermore, the periods covered by termination options are included as part of the lease term only when they are reasonably certain not to be exercised.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded on the consolidated statement of financial position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The inputs to these models are derived from observable market data where possible, but where observable market data are not available, estimation is required to establish fair values. The judgements and estimates include considerations of liquidity and model inputs such as credit risk (both own and counterparty) funding value adjustments, correlation and volatility.

Impairment loss on financial instruments

The measurement of impairment loss across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment loss and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs.

At 31 December 2019

2 ACCOUNTING POLICIES (continued)

2.6 Significant accounting estimates and judgements (continued)

Estimates and assumptions (continued)

Impairment loss on financial instruments (continued)

Elements of the ECL models that are considered accounting judgements and estimates include:

- The Group's internal credit grading model;
- The Group's criteria for assessing if there has been a significant increase in credit risk;
- The segmentation of financial assets when their ECL is assessed on a collective basis;
- Development of ECL models, including the various formulas and the choice of inputs;
- Determination of associations between macroeconomic scenarios and, economic inputs and their impact on ECL calculation; and
- Selection of forward-looking macroeconomic scenarios and their probability of occurrence, to derive the ECL models.

It has been the Group's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

During 2019, the key areas that involved a higher degree of judgment and where significant assumptions were made in the estimation of expected credit losses are described in note 1.

Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model, as well as the expected future cash inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognized by the Group.

Pensions obligation

The cost of the defined benefit pension plan is determined using an actuarial valuation. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are highly sensitive to changes in these assumptions.

3 GROUP INFORMATION

5 SEGMENT REPORTING

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segments are evaluated based on information relating to net operating income and financial position. Income taxes and operating expenses are managed on a group basis and are not allocated to operating segments.

Interest income is reported net, since Management monitors net interest income as a performance measure and not the gross income and expense amounts. Net interest income is allocated to the business segment based on the assumption that all positions are funded or invested via a central funding unit. An internal Funds Transfer Pricing (FTP) mechanism was implemented between operating segments. Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

The assets and liabilities that are reported in the segments are net from inter-segments' assets and liabilities since they constitute the basis of Management's measures of the segments' assets and liabilities and the basis of the allocation of resources between segments.

At 31 December 2019

5 SEGMENT REPORTING (continued)

Business segments

The Group operates in four major business segments: treasury; corporate banking; retail banking and asset management and private banking.

Treasury is mostly responsible for the liquidity management and market risk of the Group as well as managing the Group's own portfolio of stocks, bonds and other financial instruments. In addition, this segment provides treasury and investments products and services to investors and other institutional customers.

Corporate banking provides a comprehensive product and service offering to corporate and institutional customers, including loans and other credit facilities, deposits and current accounts, trade finance and foreign exchange operations.

Retail banking provides a diversified range of products and services to meet the personal banking and consumer finance needs of individuals. The range includes deposits, housing loans, consumer loans, credit cards, fund transfers, foreign exchange and other branch related services.

Asset management and private banking provides investment products and services to institutional investors and intermediaries.

The following tables present net operating income, total assets and total liabilities information in respect of the Group's reportable segments.

^(**) Other includes activities related to property, equipment and right-of-use assets, intongible assets, non-current assets held for sale, other assets and goodwill

B) Geographical segments

The Group operates in two geographic markets based on the location of its markets and customers. The domestic market represents the Lebanese market, and the international market represents markets outside Lebanon. The following table shows the distribution of the Group's external net operating income and non-current assets.

		2019	
	Domestic	International	Total
	LL million	LL million	LL million
Total operating income	1,220,093	122,815	1,342,908
Net impairment (loss) gain on financial assets	(501,496)	8,539	(492,957)
Net operating income	718,597	131,354	849,951
Non-current assets ²	607,214	278,641	885,855
		2018	
	Domestic	International	Total
	LL million	LL million	LL million
Total operating income	1,393,054	155,830	1,548,884
Net impairment (loss) gain on financial assets	(19,396)	2,582	(16,814)
Net operating income ¹	1,373,658	158,412	1,532,070
Non-current assets ²	599,716	269,360	869,076

¹ Net operating income is attributed to the geographical segment based on the location where the income is generated

² Non-current assets consist of property, equipment and right-of-use assets, intongible assets, non-current assets held for sale and goodwill.

At 31 December 2019

5 SEGMENT REPORTING (continued)

B) Geographical segments (continued)

Interest and similar income from exposure to the Central Bank of Lebanon and Lebanese sovereign amounted to LL 2,991,282 million (2018: LL 2,277,638 million) arising from time deposits with the Central Bank of Lebanon and financial instruments held by the Group. The breakdown of interest and similar income from exposure to the Central Bank of Lebanon and Lebanese sovereign is as follows:

	2019 LL million	2018 LL millíon
Interest and similar income		
Central Bank of Lebanon	2,756,547	2,052,977
Lebanese sovereign	234,735	224,661

Foreign exchange income includes gains and losses from spot and forward contracts, other currency derivatives and the revaluation of the daily open trading and structural positions.

10 NET GAIN (LOSS) FROM DERECOGNITION OF FINANCIAL ASSETS AT AMORTIZED COST

The Group derecognises some debt instruments classified at amortized cost due to the following reasons:

- Deterioration of the credit rating below the ceiling allowed in the Group's investment policy;
- Liquidity gap and yield management;
- Exchange of financial assets by the Central Bank of Lebanon;
- Currency risk management as a result of change in the currency base of deposits; or
- Liquidity for capital expenditures.

^{*} Included under unrealized loss from government debt securities is the unrealized loss of LL 107,717 million arising from the reclassification of the Bank's Eurobonds portfolio from financial assets at amortized cost to financial assets at fair value through profit or loss (note 21).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS At 31 December 2019

15 INCOME TAX EXPENSE

The tax rates applicable to the parent and subsidiaries vary from 0% to 40% in accordance with the income tax laws of the countries where the Group operates. For the purpose of determining the taxable results of the subsidiaries for the year, the accounting results have been adjusted for tax purposes. Such adjustments include items relating to both income and expense and are based on the current understanding of the existing tax laws and regulations and tax practices.

Income tax expense for the years ended 31 December 2019 and 2018 was as follows:

	2019 LL million	2018 LL million
Current tax	17.41	
Income tax expense – gains released from provisions for risk and charges Income tax expense – other operating results	15,644 143,139	179,184
Income tax expense	158,783	179,184

At 31 December 2019

16 EARNINGS PER SHARE

Basic earnings per share are calculated by dividing the net profit for the year attributable to ordinary equity holders of the Bank by the weighted average number of common shares outstanding during the year. The Bank does not have arrangements that might result in dilutive shares.

The following table shows the income and share data used to calculate earnings per share:

	2019 LL million	2018 LL million
Net profit for the year Less: Non-controlling interests	173,982 (8,804)	771,270 (5,513)
Net profit attributable to ordinary equity holders of the parent	165,178	765,757
	-	

At 31 December 2019

16 EARNINGS PER SHARE (continued)

		2019	2018
Weighted average number of ordinary shares for basic earnings per share		214,206,137	214,292,618

Less: Allowance for expected credit losses	(383,029)	(80,527)
er e	31,202,426	33,135,407
	1	

The table for the movement in allowances for expected credit losses of balances with the Central Bank of Lebanon under IFRS 9 is presented in the Credit Risk section (note 47).

Obligatory reserves:

- In accordance with the regulations of the Central Bank of Lebanon, banks operating in Lebanon are required to deposit with the Central Bank of Lebanon an obligatory reserve calculated on the basis of 25% of sight commitments and 15% of term commitments denominated in Lebanese Lira. This is not applicable for investment banks which are exempted from obligatory reserve requirements on commitments denominated in Lebanese Lira. Additionally, all banks operating in Lebanon are required to deposit with the Central Bank of Lebanon interest-bearing placements representing 15% of total deposits in foreign currencies regardless of nature.
- Subsidiary banks operating in foreign countries are also subject to obligatory reserve requirements determined based on the banking regulations of the countries in which they operate.

At 31 December 2019

17 CASH AND BALANCES WITH CENTRAL BANKS (continued)

Obligatory reserves: (continued)

The following table summarizes the Group's placements in central banks available against the obligatory reserves as of 31 December:

		2019	
Obligatory	Lebanese Lira LL million	Foreign currency LL million	Total LL million
Obligatory reserve Central Bank of Lebanon Other central banks	17,708	3,900,359 518,329	3,918,067 518,329

	284,207	4,195,917	4,480,124
			=

(a) At 31 December 2019, time deposits with the Central Bank of Lebanon amounting to LL 7,379,241 million and maturing in 2028 and 2029 were blocked against term borrowings granted by the Central bank of Lebanon with the same value and maturing in 2028 and 2029 (2018: LL 4,197,910 maturing in 2028) (note 30). During 2019, the Bank and the Central Bank of Lebanon signed a netting agreement for specified financial assets and liabilities that qualifies for netting under the requirements of IAS 32. Accordingly, as at 31 December 2019, time deposits with the Central Bank of Lebanon amounting to LL 7,379,241 million (2018: nil) and term borrowings from the Central Bank of Lebanon (note 30) are reported on a net basis on the statement of financial position.

20 DERIVATIVE FINANCIAL INSTRUMENTS

The Group enters into derivatives for trading and for risk management purposes. The table below shows the fair values of derivative financial instruments, recorded as assets or liabilities, together with their notional amounts. The notional amount, recorded gross, is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at year end and are not indicative of neither the market risk nor the credit risk.

Forwards and futures

Forwards and futures contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customized contracts transacted in the over-the-counter market. Futures contracts are transacted in standardized amounts on regulated exchanges and are subject to daily cash margin requirements.

Options

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or to sell a specific amount of a financial instrument at a fixed price, either at a fixed future date or at any time within a specified period.

The Group purchases and sells options through regulated exchanges and in the over-the-counter markets. Options purchased by the Group provide the Group with the opportunity to purchase (call options) or sell (put options) the underlying asset at an agreed-upon value either on or before the expiration of the option. The Group is exposed to credit risk on purchased options only to the extent of their carrying amount, which is their fair value.

Swaps

Swaps are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts, in relation to movements in a specified underlying index such as an interest rate, foreign currency rate, commodity index or equity index.

Interest rate swaps relate to contracts taken out by the Group with other counterparties (customers and financial institutions) in which the Group either receives or pays a floating rate of interest, respectively, in return for paying or receiving a fixed rate of interest. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

In a currency swap, the Group pays a specified amount in one currency and receives a specified amount in another currency. Currency swaps are mostly gross-settled.

At 31 December 2019

20 DERIVATIVE FINANCIAL INSTRUMENTS (continued)

The Group has positions in the following types of derivatives:

		2019			2018	3

	27,986	30,550	7,430,367	18,752	22,621	5,666,567	
	-		-				

Derivatives often involve at their inception only a mutual exchange of promises with little or no transfer of consideration. However, these instruments frequently involve a high degree of leverage and are very volatile. A relatively small movement in the value of the asset, rate or index underlying a derivative contract may have a significant impact on the profit or loss of the Group.

Over-the-counter derivatives may expose the Group to the risks associated with the absence of an exchange market on which to close out an open position.

The Group's exposure under derivative contracts is closely monitored as part of the overall management of the Group's market risk.

Derivative financial instruments held-for-trading purposes

Most of the Group's derivative trading activities relate to deals with customers which are normally offset by transactions with other counterparties. Also included under this heading are any derivatives entered into for hedging purposes which do not meet the IFRS 9 hedge accounting criteria.

Derivative financial instruments held for hedging purposes

As part of its asset and liability management, the Group uses derivatives for hedging purposes in order to reduce its exposure to credit and market risks. The Group uses forward foreign exchange contracts to hedge against specifically identified currency risks.

Hedge of net investment in foreign operations

During 2019, the Group renewed its forward foreign exchange contracts designated to hedge its investment in its subsidiary in France. The notional amount of these contracts amounted to Euro 107,904 thousand (LL 182,023 million) as at 31 December 2019 (2018: LL 186,105 million). The forward foreign exchange contracts were revalued as of 31 December 2019 and resulted in unrealized loss of LL 1,810 million (2018: unrealized gain of LL 707 million). The contracts mature on 21 January 2020 at the latest.

No ineffectiveness from the fair value hedge was recognized in profit or loss during the year.

At 31 December 2019

21 FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

	2019	2018
	LL million	LL million
Lebanese sovereign and Central Bank of Lebanon		
Treasury bills and bonds (a)	176,745	52,752
Private sector and other securities		
Corporate debt instruments	3,073	8,993
Equity instruments	175,904	190,593
Funds	126,432	108,963
	305,409	308,549
	482,154	361,301

(a) According to the resolution of the Investment Committee meeting held on 26 September 2019, the Group reclassified the Eurobonds portfolio amounting to LL 315,884 out of the amortized cost measurement category and into the fair value through profit or loss measurement category. At the reclassification effective date, 1 October 2019, the Bank's Eurobonds portfolio was measured at fair value through profit or loss. Unrealized loss of LL 107,717 million arising from the difference between the previous amortized cost carrying amount and the fair value of the Eurobonds portfolio was recognized in the consolidated income statement (note 9).

22 NET LOANS AND ADVANCES TO CUSTOMERS AT AMORTIZED COST

	2019	2018
	LL million	LL million
Commercial loans	5,335,323	6,627,538
Consumer loans	4,120,239	4,629,742
	9,455,562	11,257,280
Less: Allowance for expected credit losses (note 47)	(709,018)	(480,460)
	8,746,544	10,776,820

The table for the movement in allowances for expected credit losses of loans and advances to customers at amortized cost under IFRS 9 is presented in the Credit Risk section (note 47).

In accordance with the Banking Control Commission Circular No. 240, bad loans and related provisions and unrealized interest which fulfill certain requirements have been transferred to off financial position accounts. The gross balance of these loans amounted to LL 915,128 million as of 31 December 2019 (2018: LL 747,312 million).

The fair value of collateral that the Group holds relating to loans and advances to commercial customers individually determined to be impaired amounts to LL 302,598 million as of 31 December 2019 (2018: LL 116,543 million). The collateral consists of cash, securities, letters of guarantee and properties.

- (a) Following the Central Bank of Lebanon issued Intermediary Circulars, the Central Bank of Lebanon offered the commercial banks facilities up to a ceiling of LL 1,500 billion to be granted to customers and with a time limit ending on 15 October 2017. Facilities obtained are subject to an interest rate of 1% per annum payable on a monthly basis with the first payment due on 2 January 2018.
- (b) Short term borrowings in foreign currencies from the Central Bank of Lebanon amounted to LL 946,707 million as at 31 December 2019.

At 31 December 2019

30 DUE TO CENTRAL BANKS AND REPURCHASE AGREEMENTS (continued)

(c) Term borrowings under leverage arrangements with the Central Bank of Lebanon represent term borrowings denominated in Lebanese Lira, bearing an interest rate of 2% per annum and having maturities ranging between 2022 and 2033, fully invested in pledged Lebanese treasury bills and blocked term placements with Central Bank of Lebanon in Lebanese Lira earning coupon rates ranging between 6.5% per annum and 10.5%. Simultaneously the Group has further deposited with the Central Bank of Lebanon term placements in foreign currencies at 6.5% per annum and in Lebanese Lira at 10.5% per annum carrying the same maturities. During 2019, the Bank and the Central Bank of Lebanon signed a netting agreement covering only leverage arrangements that were invested in blocked term placement with the Central Bank of Lebanon in Lebanese Lira. This agreement qualifies for netting under the requirements of IAS 32.

The below tables summarises the leverage arrangements and related financial assets subject to offsetting, and enforceable similar agreements, and whether offset is achieved in the balance sheet. The table identifies the amounts that have been offset in the balance sheet and also those amounts that are covered by enforceable netting arrangements (financial collateral) but do not qualify for netting under the requirements of IAS 32 described in the accounting policies:

	2019	2018
	LL million	LL million
Deferred revenues (i)	-	160,945
Provision for risks and charges (ii)	30,756	57,210
Retirement benefits obligation (iii)	56,970	74,426
Provision for outstanding claims and IBNR reserves related to subsidiary-		
insurance companies	49,249	43,338
Provision on commitment by signature	25	2,231
Provisions for ECL on financial guarantees and commitments	12,419	2,131
Other provisions (iv)	5,312	11,780
	154,731	352,061

(i) During 2016, the Central Bank of Lebanon issued Intermediary Circular number 446 dated 30 December 2016 relating to the gain realized by banks from certain financial transactions with the Central Bank of Lebanon, consisting of the sale of financial instruments denominated in Lebanese Lira and the purchase of financial instruments denominated in US Dollars. In accordance with the provisions of this circular, banks should recognize in the income statement, only part of the gain net of tax, caped to the extent of the losses recorded to comply with recent regulatory provisioning requirements, the impairment loss on subsidiaries and goodwill recorded in accordance with IAS 36 and IFRS 3 respectively and the shortage needed to comply with the capital adequacy requirements. Lebanese banks may further recognize up to 70% of the remaining balance of the gain realized net of tax in the income statement as non-distributable profits to be appropriated to reserves for capital increase, qualifying for inclusion within regulatory Common Equity Tier One.

Besides, during 2017, the Group released an amount of LL 89,720 million (net of tax) from "Deferred revenues" whereby LL 105,552 million gross of tax were recognized in the consolidated income statement for the year ended 31 December 2017 under "Other operating income" and LL 15,832 million under "Income tax expense". As at 31 December 2017, allowance for expected credit losses include provisions constituted to comply with regulatory requirements amounting to LL 337,177 million in excess of the provisioning requirements.

During 2018, the Group used part of the "Deferred revenues" to provide for LL 126,298 million; resulting from applying IFRS 9 Expected Credit Losses (ECL) model on 1 January 2018. In addition, during 2018 the Group used an amount of LL 49,934 million from the "Deferred revenues" for the Expected Credit Loss allowance when calculating the ECL as of 31 December 2018. The remaining balance of this excess amounted to LL 160,945 million.

At 31 December 2019

35 PROVISIONS FOR RISKS AND CHARGES (continued)

During 2019, the Group released an amount of LL 76,380 million (net of tax) from "Deferred revenues" whereby LL 92,024 million gross of tax were recognized in the consolidated income statement for the year ended 31 December 2019 under "Other operating income" (note 11) and LL 15,644 million under "Income tax expense". In addition, the Group used the amount of LL 84,565 million from the "Deferred revenues" for expected credit loss allowance when calculating the ECL as of 31 December 2019.

The movement in the deferred revenues (excess provisions) is as follows:

	2019 LL million	2018 LL million
Balance at 1 January	160,945	337,177
Impact of IFRS 9 adoption	-	(126,298)
Net transfer to expected credit losses on financial assets	(84,565)	(49,934)
Write back during the year	(76,380)	-
Balance at 31 December		160,945
(ii) Provision for risks and charges	2019	2018
	LL million	LL million
Balance at 1 January	57,210	49,646
Impact of IFRS 9 adoption	-	(1,543)
Charge for the year (note 14)	14,654	10,785
Provisions paid during the year	(907)	(6)
Provisions written-back during the year (note 11)	-	(16,971)
Net transfer to expected credit losses on financial assets	(40,593)	(9,270)
Transfer from commitment by signature	-	1,721
Transfer from provisions on stage 1 commercial loans (note 47.2)	-	22,990
Provisions written-off during the year	(13)	(94)
Exchange difference	405	(48)
Balance at 31 December	30,756	57,210
(iii) Retirement benefits obligation		
	2019	2018
	LL million	LL million
Balance at 1 January	74,426	69,882
Charge for the year (note 13)	-	10,507
Write back during the year (note 13)	(12,878)	-
Benefits paid	(5,321)	(5,937)
Exchange difference	743	(26)
Balance at 31 December	56,970	74,426

⁽iv) During the year ended 31 December 2019, the Group transferred LL 5,923 million from other provisions to allowance for expected credit losses on loans and advances to customers.

Non-distributable general reserves

According to the Central Bank of Lebanon Main Circular 143, Banks in Lebanon are required to transfer to "Non-distributable general reserves", the balance of "Reserve for general banking risks" and "Reserve for retail loans" previously appropriated in line with the requirements of decision 7129 and decision 7776 respectively. This reserve is part of the Group's equity and is not available for distribution.

Legal reserve

According to the Lebanese Code of Commerce and to the Money and Credit Act, banks and companies operating in Lebanon have to transfer 10% of their annual net profit to a legal reserve. In addition, subsidiaries and branches are also subject to legal reserve requirements based on the rules and regulations of the countries in which they operate. This reserve cannot be distributed as dividends.

During 2019, the Group appropriated LL 72,148 million from 2018 profits to the legal reserve in accordance with the General Assembly of Shareholders' resolution (2018: LL 67,149 million).

At 31 December 2019

37 NON-DISTRIBUTABLE RESERVES (continued)

Reserve appropriated for capital increase

During 2019, the Group appropriated LL 4,746 million from 2018 profits to the reserve appropriated for capital increase in accordance with the General Assembly of Shareholders' resolution (2018: LL 6,745 million).

Details of the reserve for increase of share capital are as follows:

*	2019	2018

38 TREASURY SHARES

Movement of treasury shares recognized in the consolidated statement of financial position is as follows:

	2019	2019		
	Number of shares	Cost LL million	Number of shares	Cost LL million
Balance at 1 January Purchase of Treasury shares Sale of treasury shares	8,853,351 (2,303)	13,567 (36)	8,567,050 326,751 (40,450)	8,473 5,766 (672)
Balance at 31 December	8,851,048	13,531	8,853,351	13,567

The treasury shares represent 1,078,185 Global Depositary Receipts (GDR) and 7,772,863 ordinary shares owned by the Group as at 31 December 2019 (2018: 1,078,185 Global Depository Receipts (GDR) and 7,775,166 ordinary shares). The market value of one GDR and one ordinary share were USD 6.07 and USD 7.07 respectively as of 31 December 2019 (2018: USD 9.31 and USD 9.25 respectively).

The Group realized a loss of LL 7 million from the sale of treasury shares during the year 2019 (2018: gain of LL 68 million). Gains and losses are reflected in the "Non-distributable reserves".

39 CHANGE IN FAIR VALUE OF FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

Movement of the change in fair value of financial assets at fair value through other comprehensive income during the year was as follows:

	2019 LL million	2018 LL million
At January	(957)	614
Impact of IFRS 9 at 1 January	-	(2,192)

41 DIVIDENDS DECLARED AND PAID

In accordance with the Central Bank of Lebanon intermediary circular 532, the Board of Directors does not propose the payment of dividends for 2019.

According to the resolution of the General Assembly meeting held on 16 April 2019, the following dividends were declared and paid, from the 2018 profits.

	2019		
	Number of shares	Dividends per share in LL	Total LL million
Dividends on common shares	214,204,717	1,700	364,148

The dividends on common shares, declared on 16 April 2019 were paid net of the treasury shares as of that date.

According to the resolution of the General Assembly meeting held on 11 April 2018, the following dividends were declared and paid, from the 2017 profits.

		2018	
	Number of shares	Dividends per share	Total
		in LL	LL million
Dividends on common shares	214,316,591	1,700	364,338

The dividends on common shares, declared on 11 April 2018 were paid net of the treasury shares as of that date.

42 FAIR VALUE OF THE FINANCIAL INSTRUMENTS

The fair values in this note are stated at a specific date and may be different from the amounts which will actually be paid on the maturity or settlement dates of the instrument. In many cases, it would not be possible to realize immediately the estimated fair values given the size of the portfolios measured. Accordingly, these fair values do not represent the value of these instruments to the Group as a going concern. Financial assets and liabilities are classified according to a hierarchy that reflects the significance of observable market inputs. The three levels of the fair value hierarchy are defined below:

At 31 December 2019

42 FAIR VALUE OF THE FINANCIAL INSTRUMENTS (continued)

Quoted market prices - Level 1

Financial instruments are classified as Level 1 if their value is observable in an active market. Such instruments are valued by reference to unadjusted quoted prices for identical assets or liabilities in active markets where the quoted price is readily available, and the price represents actual and regularly occurring market transactions on an arm's length basis. An active market is one in which transactions occur with sufficient volume and frequency to provide pricing information on an ongoing basis.

Valuation technique using observable inputs - Level 2

Financial instruments classified as Level 2 have been valued using models whose most significant inputs are observable in an active market. Such inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical instruments in inactive markets, and observable inputs other than quoted prices such as interest rates and yield curves, implied volatilities, and credit spreads.

Valuation technique using significant unobservable inputs - Level 3

Financial instruments are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data (unobservable inputs). A valuation input is considered observable if it can be directly observed from transactions in an active market, or if there is compelling external evidence demonstrating an executable exit price. Unobservable input levels are generally determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

Fair value measurement hierarchy of the Group's financial assets and liabilities carried at fair value:

Currency swaps	-	2,203	-	2,203

There were no transfers between levels during 2019 (2018: the same).

Valuation techniques used for material classes of financial assets and liabilities categorized within Level 2 and Level 3:

Derivatives

Derivative products are valued using a valuation technique with market observable inputs. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates.

Funds and Equity Shares of Non-listed Entities

Units held in funds are measured based on their net asset value (NAV), taking into account redemption and/or other restrictions. Classification between Level 2 and Level 3 is dependent on whether the NAV is observable or unobservable (i.e. recent and published by the fund administrator or not).

Equity shares of non-listed entities are investments in private companies, for which there is no or only limited sufficient recent information to determine fair value. The Bank determined that cost adjusted to reflect the investee's financial position and results since initial recognition represents the best estimate of fair value. Classification between Level 2 and Level 3 is based on whether the financial statements of the investee are recent and published or not. These instruments are fair valued using third-party information (NAV or financial statements of non-listed entities), without adjustment. Accordingly, quantitative information about significant unobservable inputs and sensitivity analysis cannot be developed by the Bank in accordance with IFRS 13.93 (d).

At 31 December 2019

42 FAIR VALUE OF THE FINANCIAL INSTRUMENTS (continued)

Comparison of carrying and fair values for financial assets and liabilities not held at fair value:

The fair values included in the table below were calculated for disclosure purposes only. The fair valuation techniques and assumptions described below relate only to the fair value of the Group's financial instruments not measured at fair value. Other institutions may use different methods and assumptions for their fair value estimations, and therefore such fair value disclosures cannot necessarily be compared from one institution to another.

Financial assets and liabilities concentrated in Lebanon

These assets and liabilities consist of balances with the Central Bank of Lebanon and Lebanese Banks, Lebanese government securities, loans and advances to customers and related parties, due to the Central Bank of Lebanon and Lebanese Banks, customers and related parties deposits, and debt issued and other borrowed funds. These are illiquid in nature and the measurement of their fair value is usually determined through discounted cash flow valuation models using observable market inputs, comprising of interest rates and yield curves, implied volatilities, and credit spreads. Due to the situation described in note 1 and the unprecedent levels of uncertainty surrounding the economic crisis that Lebanon, and particularly the banking sector, is experiencing, management is unable to produce faithful estimation of the fair value of these financial assets and liabilities.

Financial assets and liabilities not concentrated in Lebanon

The fair values of financial assets and liabilities not concentrated in Lebanon that are not held at fair value are as follows:

31 December 2019	Carrying		Fair Value

At 31 December 2019

42 FAIR VALUE OF THE FINANCIAL INSTRUMENTS (continued)

Assets and liabilities for which fair value is disclosed using a valuation technique with significant observable inputs (Level 2) and / or significant unobservable inputs (Level 3)

For financial assets and financial liabilities that are liquid or have a short term maturity (less than three months), the Group assumed that the carrying values approximate the fair values. This assumption is also applied to demand deposits which have no specific maturity and financial instruments with variable rates.

Deposits with banks and loans and advances to banks

For the purpose of this disclosure there is minimal difference between fair value and carrying amount of these financial assets as they are short-term in nature or have interest rates that re-price frequently. The fair value of deposits with longer maturities are estimated using discounted cash flows applying market rates for counterparties with similar credit quality.

Government bonds, certificates of deposit and other debt securities

The Group values these unquoted debt securities using discounted cash flow valuation models where the lowest level input that is significant to the entire measurement is observable in an active market. These inputs include assumptions regarding current rates of interest and credit spreads.

Loans and advances to customers

For the purpose of this disclosure, fair value of loans and advances to customers is estimated using discounted cash flows by applying current rates for new loans granted during the year with similar remaining maturities and to counterparties with similar credit quality.

Deposits from banks and customers

In many cases, the fair value disclosed approximates carrying value because these financial liabilities are short-term in nature or have interest rates that re-price frequently. The fair value for deposits with long-term maturities, such as time deposits, are estimated using discounted cash flows, applying either market rates or current rates for deposits of similar remaining maturities.

43 CONTINGENT LIABILITIES, COMMITMENTS AND LEASING ARRANGEMENTS

Credit - related commitments and contingent liabilities

To meet the financial needs of customers, the Group enters into various commitments, guarantees and other contingent liabilities, which are mainly credit-related instruments including both financial and non-financial guarantees and commitments to extend credit. Even though these obligations may not be recognized on the consolidated statement of financial position, they do contain credit risk and are therefore part of the overall risk of the Group. The table below discloses the nominal principal amounts of credit-related commitments and contingent liabilities. Nominal principal amounts represent the amount at risk should the contracts be fully drawn upon and clients default. As a significant portion of guarantees and commitments is expected to expire without being withdrawn, the total of the nominal principal amount is not indicative of future liquidity requirements.

	2019		
	Banks LL million	Customers LL million	Total LL million

Other commitments	1,567	52,222	53,789
	2,635,247	2,928,691	5,563,938

Guarantees issued

Guarantees are given as security to support the performance of a customer to third parties. The main types of guarantees provided are:

- Financial guarantees given to banks and financial institutions on behalf of customers to secure loans, overdrafts, and other banking facilities; and
- Other guarantees are contracts that have similar features to the financial guarantee contracts but fail to meet the strict definition of a financial guarantee contract under IFRS. These include mainly performance and tender guarantees.

Documentary credits

Documentary credits commit the Group to make payments to third parties, on production of documents, which are usually reimbursed immediately by customers.

Loan commitments

Loan commitments are defined amounts (unutilized credit lines or undrawn portions of credit lines) against which clients can borrow money under defined terms and conditions.

Revocable loan commitments are those commitments that can be cancelled at any time (without giving a reason) subject to notice requirements according to their general terms and conditions. Irrevocable loan commitments result from arrangements where the Group has no right to withdraw the loan commitment once communicated to the beneficiary.

Legal claims

Litigation is a common occurrence in the banking industry due to the nature of the business. The Group has an established protocol for dealing with such legal claims. Once professional advice has been obtained and the amount of damages reasonably estimated, the Group makes adjustments to account for any adverse effects which the claims may have on its financial standing. At year end, the Group had several unresolved legal claims including those relating to the restrictive measures and capital controls in place. Based on advice from legal counsel, and despite the novelty of the certain claims and the uncertainties inherent in their unique situation management believes that legal claims will not result in any significant financial loss to the Group, except as provided for in note 51.

For the year ended 31 December 2019

43 CONTINGENT LIABILITIES, COMMITMENTS AND LEASING ARRANGEMENTS (continued)

Operating lease and capital expenditure commitments

Capital expenditures and lease payments that were not provided for as of the consolidated statement of financial position date are as follows:

	2019 LL million	2018 LL million
Capital commitments Property and equipment	6,800	14,950

Other commitments and contingencies

Certain areas of the Lebanese tax legislation and the tax legislations where the subsidiaries operate are subject to different interpretations in respect of the taxability of certain types of financial transactions and activities.

The books of the Head Office and Lebanese branches of the Bank were reviewed by the tax authorities for the years 2012 to 2014 (inclusive). The tax authorities issued a final report on 27 February 2018 resulting in additional taxes of LL 1,486 million which were settled by the Bank during the year 2018.

In addition, the Bank's books in Lebanon for the years 2015 to 2017 (inclusive) are currently under the review of the tax authorities. The Bank's books in Lebanon remain subject to the review of the tax authorities for the years 2018 and 2019.

The books of the Head Office and Lebanese branches of the Bank were reviewed by the National Social Security Fund (NSSF) and were subject to a discharge for the period from 1 March 1998 until 31 October 2014. The Bank's books in Lebanon remain subject to the review by the NSSF for the period from 1 November 2014 to 31 December 2019.

In addition, the subsidiaries' books and records are subject to review by the tax and social security authorities in the countries in which they operate.

Management believes that adequate provisions were recorded against possible review results to the extent that they can be reliably estimated.

44 ASSETS HELD IN CUSTODY AND UNDER ADMINISTRATION

Assets held in custody and under administration include client assets managed or deposited with the Group. For the most part, the clients decide how these assets are to be invested.

	2019	2018
	LL million	LL million
Assets held in custody and under administration	9,973,201	10,655,083

The Group provides safekeeping and servicing activities on behalf of clients, in addition to various support functions including the valuation of portfolios of securities and other financial assets, which complements the custody business.

For the year ended 31 December 2019

45 RELATED PARTY TRANSACTIONS

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operating decisions, or one other party controls both. The definition includes subsidiaries, key management personnel and their close family members, as well as entities controlled or jointly controlled by them.

A list of the Group's principal subsidiaries is shown in note 3. Transactions between the Bank and its subsidiaries meet the definition of related party transactions. However, where these are eliminated on consolidation, they are not disclosed in the Group's consolidated financial statements.

Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Bank, directly or indirectly.

Loans to related parties, (a) were made in the ordinary course of business, (b) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the same time for comparable transactions with others and (c) did not involve more than a normal risk of collectability or present other unfavorable features.

Related party balances included in the Group's Statement of Financial Position are as follows as of 31 December:

	Key management personnel	Other related parties	Expected credit loss	Total				
	Outstanding balance LL million	Outstanding balance LL million	Outstanding balance LL million	Outstanding balance LL million				
Deposits	34,514	78,795	-	113,309

For the year ended 31 December 2019

45 RELATED PARTY TRANSACTIONS (continued)

Key management personnel

Total remuneration awarded to key management personnel represents the awards made to individuals that have been approved by the Board Remuneration Committee as part of the latest pay round decisions. Figures are provided for the period that individuals met the definition of key management personnel.

	2019 LL million	2018 LL million
Short-term benefits	40,581	61,712
Post-employment benefits (written-back) charged for the year, net	(12,306)	2,928

Short-term benefits comprise of salaries, bonuses, profit-sharing, attendance fees and other benefits.

46 RISK MANAGEMENT

The Group is exposed to various types of risks, some of which are:

- Credit risk: the risk of default or deterioration in the ability of a borrower to repay a loan,
- Market risk: the risk of loss in balance sheet and off-balance sheet positions arising from movements in market prices. Movements in market prices include changes in interest rates (including credit spreads), exchange rates and equity prices.
- Liquidity risk: the risk that the Group cannot meet its financial obligations when they come due in a timely manner and at reasonable cost.
- Operational risk: the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events.
- Other risks faced by the Group include concentration risk, reputation risk, legal risk, political risk and business/strategic risk.

The Group manages its business activities within risk management guidelines as set by the Group's "Risk Management Policy" approved by the Board of Directors. The Group recognizes the role of the Board of Directors and executive management in the risk management process as set out in the Banking Control Commission circular 242. In particular, it is recognized that ultimate responsibility for establishment of effective risk management practices and culture lies with the Board of Directors as does the establishing of the Group's risk appetite and tolerance levels. The Board of Directors delegates through its Risk Management Committee the day—to—day responsibility for establishment and monitoring of risk management process across the Group's group to the Group Chief Risk Officer, who is directly appointed by the Board of Directors, in coordination with executive management at BLOM Bank SAL.

The Board's Risk Management Committee has the mission to periodically (1) review and assess the risk management function of the Group, (2) review the adequacy of the Group's capital and its allocation within the Group, and (3) review risk limits and reports and make recommendations to the Board.

The Group Chief Risk Officer undertakes his responsibilities through the "Group Risk Management Division" in Beirut which also acts as Group Risk Management, overseeing and monitoring risk management activities throughout the Group. The Group Chief Risk Officer is responsible for establishing the function of Risk Management and its employees across the Group.

BLOM Bank's Risk Management aids executive management in monitoring, controlling and actively managing and mitigating the Group's overall risk. The Division mainly ensures that:

- Risk practices are fit for purpose and aligned with best practices as far as practicable.
- Risk policies and methodologies are consistent with the Group's risk appetite.
- Limits and risk across banking activities are monitored and managed throughout the Group.

For the year ended 31 December 2019

46 RISK MANAGEMENT (continued)

Through a comprehensive risk management framework, transactions and outstanding risk exposures are quantified and compared against authorized limits, whereas non-quantifiable risks are monitored against policy guidelines as set by the Group's "Risk Management Policies". Any discrepancies, breaches or deviations are escalated to executive senior management in a timely manner for appropriate action.

In addition to the Group's Risk Management in Lebanon, risk managers and / or risk officers were assigned within the Group's foreign subsidiaries or branches to report to the Group Risk Management and executive senior management in a manner that ensures:

- Standardization of risk management functions and systems developed across the Group.
- Regional consistency of conducted business in line with the board's approved risk appetite.

The major objective of risk management is the implementation of sound risk management practices and the Basel frameworks as well as all related regulatory requirements within the Group. The Group has documented a Board approved Disclosure Policy.

47 CREDIT RISK

Credit risk is the risk that the Group will incur a loss because its customers or counterparties fail to discharge their contractual obligations, including the full and timely payment of principal and interest. Credit risk arises from various balance sheet and off-balance sheet exposures including interbank, loans and advances, credit commitments, financial guarantees, letters of credit, acceptances, investments in debt securities (including sovereign) and derivative financial instruments. Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values, as recorded in the statement of financial position.

47.1 Credit risk management

Credit risk appetite and limits are set at the Group level by the Board and are cascaded to the entities, which in turn formulate their own limits in line with the Group's risk appetite. The Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentrations, and by monitoring exposures in relation to such limits.

Credit risk is monitored by the Group's Credit Risk Department, which is responsible for assisting the Group in establishing a credit risk management culture that promotes good analysis, judgement, flexibility and balance between risk and reward.

The Group has established various credit quality review processes to provide early identification of possible changes in the creditworthiness of counterparties, including regular revisions of credit files, including ratings and collateral quality. The credit quality review process allows the Group early detections of changes in assets quality, estimate the potential loss and take early corrective actions.

As part of its credit risk governance structure, the Group has established credit committees for the approval and renewal of credit facilities. Credit committees are responsible for the approval of facilities up to the limit assigned to them, which depends on the size of the exposure and the obligor's creditworthiness as measured by his internal rating. Once approved, facilities are disbursed when all the requirements set by the respective approval authority are met and documents intended as security are obtained and verified by the Credit Administration function.

During 2019, the economic situation in Lebanon exerted significant pressure on the asset quality of the domestic loan portfolio. As a result, credit quality of the Lebanese loan portfolio has declined driven by a weakening in the borrowers' creditworthiness across various segment types. In order to address the challenging operating conditions, the Group has implemented a series of remedial actions that included: i) risk deleveraging by reducing its assets size, ii) increasing collection capacity across various business lines, iii) increasing specific and collective provision coverages, and iv) setting-up an independent, centralised and specialised remedial function to proactively manage borrowers showing weak or deteriorating credit profiles and not yet classified Stage 3.

For the year ended 31 December 2019

47 CREDIT RISK (continued)

47.2 Expected credit losses (ECL)

47.2.1 Governance and oversight of expected credit losses

The Group's IFRS 9 Impairment Committee, which is a committee composed of Executive Committee members, oversees the ECL estimation framework by: i) approving the IFRS 9 impairment policy; ii) reviewing key assumptions and estimations that are part of the ECL calculations; iii) approving the forward-looking economic scenarios; iv) approving staging classifications on a name-by-name basis for material exposures and v) reviewing ECL results.

Impairment policy requirements are set and reviewed regularly, at a minimum annually, to maintain adherence to accounting standards and evolving business models. Key judgements inherent in policy, including the estimated life of revolving credit facilities and the quantitative criteria for assessing the Significant Increase in Credit Risk (SICR), are assessed through a combination of expert judgement and data-driven methodologies.

ECL is estimated using a model that takes into account borrowers' exposure, internal risk rating, facility characteristic macroeconomy, and collateral information among others. Models are, by their nature, relying on minimal required historical data as well as incorporating expert opinion are subject to biased output thus, the Group has established a systematic approach for the development, validation, approval, implementation and ongoing use of the models. Models are statistically validated by a qualified independent party to the model development unit, before first use and at a minimum annually thereafter. Each model is designated an owner who is responsible for:

- Monitoring the performance of the model, which includes comparing estimated ECL versus actual ECL: and
- Proposing post-model development calibration to enhance model's accuracy or to account for situations
 where known or expected risk factors and information have not been considered in the modelling
 process.

Each model used in the estimation of ECL, including key inputs, are governed by a series of internal controls, which include the validation of completeness and accuracy of data, reconciliation with finance data, and documentation of the calculation steps.

ECL estimation takes into account a range of future economic scenarios, which are set using mathematical models and expert judgement. Economic scenarios are prepared on a frequent basis, at a minimum annually, to align with the Group's medium-term planning exercise, but also in the event of significant change in the prevailing economic conditions. The scenario probability weights are also updated when the scenarios are updated.

47.2.2 Definition of default and cure

The Group considers a financial instrument defaulted for ECL calculations when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realizing security (if any is held);
- the borrower is more than 90 days past due on any material credit obligation to the Group.
- it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

As a part of a qualitative assessment of whether a customer is in default, the Group carefully considers whether the events listed above should result in classifying the exposures in Stage 3 for ECL calculations or whethere Stage 2 is appropriate.

It is the Group's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 3 when none of the default criteria have been present for a specific period of time and after obtaining the approval of the Credit Committee. The decision whether to classify an asset as Stage 2 or Stage 1 once cured is dependent on the absence of SICR criteria compared to initial recognition and is examined on a case by case basis. In case of forbearance under Stage 2, the borrower remains in this stage until all the following conditions have been met: i) at least a 12-month probation period has passed, ii) three consecutive payments under the new repayment schedule have been made, iii) the borrower has no past dues under any obligation to the Group, and iv) all the terms and conditions agreed to as part of the restructuring have been met.

For the year ended 31 December 2019

47 CREDIT RISK (continued)

47.2.3 The Group's internal rating and PD estimation process

Treasury, trading and interbank relationships

For non-loan exposures, external credit ratings are used and mapped to the corresponding PDs reported by credit rating agencies. During 2019, sovereign exposures including central bank balances which follow guidelines set out in the Central Bank of Lebanon Intermediary Circular 543. These are continuously monitored and updated.

Non-consumer loans

The Credit Risk function, which is independent from business lines, is responsible for the development of internal rating models, and for the estimation of Probability of Default (PD) and Loss Given Default (LGD). The Group uses an internal rating scale comprised of 10 performing grades and 3 non-performing grades. The grades generated by internal rating models are mapped to PDs using historical default observations. The mapping of rating to PD, which is done initially on a through-the-cycle basis is then adjusted to a point-in-time basis in line with IFRS 9 requirements.

These internal rating models for the Group's key lending portfolios including Corporate and SME obligors incorporate both qualitative and quantitative criteria such as:

- Historical and projected financial information including debt service coverage, operations, liquidity and capital structure;
- Account behavior, repayment history and outside and other non-financial information such as management quality, company standing and industry risk;
- Moody's Rating Agency publicly available information related to the clients from external parties. This
 includes external rating grades issued by rating agencies, independent analyst reports and other market
 disclosures; and
- Any other objectively supportable information on the obligor's willingness and capacity of repayment.

Internal ratings are initially assigned by the credit origination functions (i.e. business lines) and are approved and validated by the Credit Review and Credit Risk function, which are independent from business lines. Credit Review and Credit Risk functions are responsible for ensuring that ratings assigned to obligors are accurate and updated at all times.

Consumer loans

Consumer lending comprises mainly of personal loans, credit cards, car loans and housing loans. These products are rated by an automated scorecard tool primarily driven by days past due.

The Group also relies on account behavior to predict the probability of default within a specific timeframe. This is primarily based on the repayment history of consumer borrowers.

For the estimation of expected losses for consumer products, the Group uses currently the loss rate approach by product based on the net flow of exposures from one days-past-due bucket to another. This estimation incorporates by a forward-looking component in line with the IFRS9 standard.

47.2.4 Exposure at default

EAD represents the expected exposure in the event of a default. The Group derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EADs are potential future amounts that may be drawn under the contract. For financial guarantees, the EAD represents the amount of the guaranteed exposure when the financial guarantee becomes payable.

47.2.5 Loss given default

LGD is the magnitude of the likely loss if there is a default. The Group estimates LGD based on the history of recovery rates of claims against defaulted counterparties. It is estimated using information on the counterparty and collateral type including recovery costs. For portfolios in respect of which the Group has limited historical data, credit expert opinion benchmarked against related regulators is used to supplement the internally available data.

For the year ended 31 December 2019

47 CREDIT RISK (continued)

47.2 Expected credit losses (ECL) (continued)

47.2.6 Significant increase in credit risk

The Group continuously monitors all its credit risk exposures. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Group assesses whether there has been a significant increase in credit risk since initial recognition, using reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment including forward-looking information. The Group's assessment of significant increase in credit risk is being performed at least quarterly based on the following:

Non-Consumer loans

Migration of obligor risk rating by a certain number of notches from origination to reporting date as a key indicator of the change in the risk of default at origination with the risk of default at reporting date.

Consumer loans

Thresholds have been based on historical default rates and historical payment behavior to determine significant increase in credit risk.

Qualitative criteria

For non-Consumer loans, the Group also considers in its assessment of significant increase in credit risk, various qualitative factors including significant adverse changes in the business condition, restructuring due to credit quality weakness during the past 12-months, classification of an exposure under the "Follow-up and arrange" supervisory classification. For Consumer loans, the Group considers specific events that might be indicative of a significant increase in credit risk such as the event of restructuring.

A financial instrument considered to have experienced a significant increase in credit risk if the instruments is more than 90 days past due on its contractual payments. Movements between Stage 2 and Stage 3 are based on whether financial assets are credit-impaired at the reporting date.

47.2.7 Expected life

With the exception of credit cards and other revolving facilities the maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Group has the legal right to call it earlier. With respect to credit cards and other revolving facilities, the Group does not limit its exposure to credit losses to the contractual notice period, but, instead calculates ECL over a period that reflects the Group's expectations of the customer behavior, its likelihood of default and the Group's future risk mitigation procedures, which could include reducing or cancelling the facilities.

47.2.8 Forward looking information

The Group incorporates forward-looking information at the level of Probability of Default.

On the PD level, the Group formulates three economic scenarios: a base case, which is the median scenario assigned with a certain probability of occurring, and two other scenarios, one upside and one downside, each assigned a specific chance of occurring, then, a weighted average PD is generated and used for the calculation of the ECL.

External information considered includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Group operates, organizations such as World Bank and the International Monetary Fund, IIF and selected private-sector and academic forecasters. A team of specialists within the Group's Credit Risk Department verifies the accuracy of inputs to the Group's ECL models including determining the weights attributable to the multiple scenarios of the PD.

The Group seeks the highest correlation between macro-economic variables and historical PDs for each portfolio to identify the key divers for Point in Time Probability of default which is translated into the ECL. Using an analysis of historical data, the Group has estimated relationships between this macro-economic variable and credit losses. The ECL estimates have been assessed for sensitivity to changes to forecasts of the macro-variable and also together with changes to the weights assigned to the scenarios. The environment is subject to rapid change due to the effects of the economic crisis and uncertainties disclosed in note 1. Forecasts and scenarios are based on the best available information at the date of the approval of these consolidated financial statements, combined with expert judgment. It is not practical at this time to determine and provide sensitivity analysis that is reasonably possible.

For the year ended 31 December 2019

47 CREDIT RISK (continued)

47.2 Expected credit losses (ECL) (continued)

47.2.9 Modified and forborne loans

The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan whose terms have been modified may be derecognized and the renegotiated loan recognized as a new loan at fair value in accordance with the accounting policy set out in the Summary of significant accounting policies above.

When modification results in derecognition, a new loan is recognized and allocated to Stage 1 (assuming it is not credit-impaired at that time).

The Group renegotiates loans to customers in financial difficulties (referred to as 'forbearance activities') to maximize collection opportunities and minimize the risk of default. Under the Group's forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms. The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants. Both consumer and corporate loans are subject to the forbearance policy.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk.

The table below includes Stage 2 and 3 assets that were modified and, therefore, treated as forborne during the period, with the related modification loss suffered by the Group.

For the year ended 31 December 2019

47 CREDIT RISK (continued)

47.4 Credit quality

The Group assesses the quality of its credit portfolio using the following credit rating methodologies:

- External ratings from approved credit rating agencies for financial institutions and financial assets.
- (ii) Internal rating models that take into account both financial as well as non-financial information such as management quality, operating environment and company standing.
- (iii) Internally developed scorecards to assess the creditworthiness of retail borrowers in an objective manner and streamline the decision-making process.
- (iv) Supervisory ratings, comprising six main categories: (a) Regular includes borrowers demonstrating good to excellent financial condition, risk factors, and capacity to repay. These loans demonstrate regular and timely payment of dues, adequacy of cash flows, timely presentation of financial statements, and sufficient collateral/guarantee when required. (b) Follow-up represents a lack of documentation related to a borrower's activity, an inconsistency between facilities' type and related conditions. (c) Follow-up and arrange includes credit worthy borrowers requiring close monitoring without being impaired. These loans might be showing weaknesses; insufficient or inadequate cash flows; highly leveraged; deterioration in economic sector or country where the facility is used; loan rescheduling more than once since initiation; or excess utilization above limit. (d) Substandard loans include borrowers with incapacity to repay from identified cash flows. Also included under this category are those with recurrent late payments and financial difficulties. (e) Doubtful loans where full repayment is questioned even after liquidation of collateral. It also includes loans stagnating for over 6 months and debtors who are unable to repay restructured loans. Finally, (f) Bad loans with no or little expected inflows from business or assets. This category also includes borrowers with significant delays and deemed insolvent.

Sovereign

The Group applies two different PDs based on rating agencies' external studies.

A forward-looking adjustment is performed on both PDs via beta regression by considering the relevant macro-economic factors as published by International data sources. The resulting PiT and forward-looking PDs are then used in the ECL calculation under the base case. The Group then projects these factors under a lower and upper scenario. This year and in compliance with the Central Bank of Lebanon Intermediary Circular 543, the Group applied the regulatory ECL's ceiling for sovereign exposures (i.e. ECL of 1.89% for Central Bank of Lebanon exposures in foreign currencies and ECL of 0% for sovereign and Central Bank of Lebanon exposures in local currency).

Banks and financial institutions

The Group considers that the credit spread above a given LIBOR rate is a reflective rate for expected credit loss. The cost of risk is considered as a proxy for PD and LGD.

Debt securities

The Group assigns the second lowest rating amongst the three rating agencies (Moody's, Standard & Poor's and Fitch) for each instrument. The Group also segregates the country of issuance of these debt securities between Emerging and Advanced Economies based on the International data sources studies. The Group then conducts a correlation analysis per rating grade for each of the considered group of Advanced Economies and Emerging Economies. The resulting PDs are PiT and forward looking. The Group then generated scenarios at the PD level.

Commercial loans

In accordance to the Group's policy, default is defined when the borrower is 90 days' past due, along with other qualitative indicators on a case-by-case basis. The default definition is reflected in the collection of the default rates on a yearly basis, to be used in the calibration stage of the PD calculation.

Consumer Ioans

For the purpose of the loss rate calculation, the Group segregates its Consumer loans portfolio by product and displays the portfolio breakdown by DPD bucket. The Group adopts this approach for its Consumer facilities that fall within Stage 1. The Group then analyzes monthly net flow rates whereby the loss rate for each delinquency bucket is computed by considering the flow into the designated loss bucket at which write-off is assumed to occur. Forward looking loss rate is then projected through analysis of correlation with macroeconomic factors and regressed under lower, base and upper scenarios.

For the year ended 31 December 2019

47 CREDIT RISK (continued)

47.4 Credit quality (continued)

The table below shows the credit quality of the Group's financial assets and Contingent liabilities based on internal credit ratings and stage classification. The amounts presented are gross of impairment allowances.

The schedules shown above exclude the undrawn commitments to lend of LL 1,082,043 million for the year ended 31 December 2019 (2018: LL 1,790,521 million).

Collateral and other credit enhancements

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented regarding the acceptability of types of collateral and valuation parameters.

Management monitors the market value of collateral on a regular basis and requests additional collateral in accordance with the underlying agreement when deemed necessary.

For the year ended 31 December 2019

47 CREDIT RISK (continued)

47.5 Maximum exposure to credit risk and collateral and other credit enhancements (continued)

Collateral and other credit enhancements (continued)

The main types of collateral obtained are as follows:

- Securities: the balances shown represent the fair value of the securities.
- Letters of credit / guarantees: The Group holds in some cases guarantees, letters of credit and similar instruments from banks and financial institutions which enable it to claim settlement in the event of default on the part of the counterparty. The balances shown represent the notional amount of these types of guarantees held by the Group.
- o Real estate (commercial and residential): The Group holds in some cases a first degree mortgage over residential property (for housing loans) and commercial property (for commercial loans). The value shown reflects the fair value of the property limited to the related mortgaged amount.

In addition, the Group also obtains guarantees from parent companies for loans to their subsidiaries, personal guarantees for loans to companies owned by individuals and assignments of insurance proceeds and revenues, which are not reflected in the above table.

48 MARKET RISK

Market risk is defined as the potential loss in both on balance sheet and off-balance sheet positions resulting from movements in market risk factors such as foreign exchange rates, interest rates and equity prices.

Bank Risk Management is responsible for generating internal reports quantifying the Group's earnings at risk due to extreme movements in interest rates, while daily monitoring the sensitivity of the Group's trading portfolio of fixed income securities to changes in market prices and / or market parameters. The Group's Asset and Liability Management (ALM) policy assigns authority for its formulation, revision and administration to the Asset / Liability Committee (ALCO) of BLOM Bank SAL. Bank Risk Management is responsible for monitoring compliance with all limits set in the ALM Policy ranging from core foreign currency liquidity to liquidity mismatch limits to interest sensitivity gap limits. The Group has an Asset and Liability Management system "Focus ALM" that automates the risk measurement of the Group's assets and liabilities including stress testing and extensive scenario analysis.

A. CURRENCY RISK

Foreign exchange (or currency) risk is the risk that the value of a portfolio will fall as a result of changes in foreign exchange rates. The major sources of this type of market risk are imperfect correlations in the movements of currency prices and fluctuations in interest rates. Therefore, exchange rates and relevant interest rates are acknowledged as distinct risk factors.

For the year ended 31 December 2019

48 MARKET RISK (continued)

A. CURRENCY RISK (continued)

48 MARKET RISK (continued)

A. CURRENCY RISK (continued)

The Group's exposure to currency risk

The Group is subject to currency risk on financial assets and liabilities that are denominated in currencies other than the Lebanese Pound. Most of these financial assets and liabilities are in US Dollars and Euros. As disclosed in note 1, the Group's assets and liabilities in foreign currencies are valued at the official exchange rate, and due to the high volatility and the significant variance in exchange rates between the multiple markets, management is unable determine what would be a reasonable possible movement in order to provide useful quantitative sensitivity analysis. The impact of the valuation of these assets and liabilities at a different rate will be recognized in the consolidated financial statements once the change in the official exchange rate is implemented by the Lebanese Government.

B. INTEREST RATE RISK

Interest rate risk arises from the possibility that changes in interest rates will affect the fair values of the financial instruments. The Group is exposed to interest rate risk as a result of mismatches of interest rate repricing of assets and liabilities that mature or are re-priced in a given period. The Group manages the risk by matching the re-pricing of assets and liabilities through risk management strategies. Positions are monitored on a daily basis by management.

Interest rate sensitivity

The table below shows the sensitivity of interest income to basis points changes in interest rates, all other variables held constant. Given the novel and prolonged nature of current economic crisis and the high levels of uncertainties, the Group expects lower interest rates during 2020. The Central Bank of Lebanon has already decreased interest rates though issuance of Intermediary Circulars 536 and 544 (refer to note 1). The Group is unable to determine what would be a reasonable possible change in interest rates; however, the Group has a sensitivity analysis based on a decrease in 100 basis points.

The impact of interest rate changes on net interest income is due to assumed changes in interest paid and received on floating rate financial assets and liabilities and to the reinvestment or refunding of fixed rated financial assets and liabilities at the assumed rates. The change in interest income is calculated over a 1-year period. The impact also incorporates the fact that some monetary items do not immediately respond to changes in interest rates and are not passed through in full, reflecting sticky interest rate behaviour. The pass-through rate and lag in response time are estimated based on historical statistical analysis and are reflected in the outcome.

The sensitivity of equity was calculated for an decrease in basis points whereby a similar decrease has an equal and offsetting effect on net interest income.

	_	Sensitivity of Net In	terest Income
		2019	2018
	Decrease in Basis Points	LL million	LL million
Lebanese Lira United States Dollar	(100) (100)	18,524 38,800	34,020 44,366
Euro	(100)	9,356	10,232

Interest sensitivity gap

The Group's interest sensitivity position based on contractual repricing arrangements is shown in the table below. The expected repricing and maturity dates may differ significantly from the contractual dates, particularly with regard to the maturity of customer demand deposits.

For the year ended 31 December 2019

C. EQUITY PRICE RISK

Equity price risk is the risk that the fair value of equities decreases as the result of a change in stock prices. Equity price risk exposure arises from equity securities classified at fair value through profit or loss. A 5 percent increase in the value of the Group's equities at 31 December 2019 would have increased net income by LL 8,795 million (2018: LL 9,530 million). An equivalent decrease would have resulted in an equivalent but opposite impact.

D. PREPAYMENT RISK

Prepayment risk is the risk that the Group will incur a financial loss because its customers and counterparties repay or request repayment earlier than expected, such as housing loans when interest rates fall.

Market risks that lead to prepayments are not material with respect to the markets where the Group operates. Accordingly, the Group considers prepayment risk on net profits as not material after considering any penalties arising from prepayments.

For the year ended 31 December 2019

49 LIQUIDITY RISK

Liquidity risk is defined as the risk that the Group will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises because of the possibility that the Group might be unable to meet its payment obligations when they fall due under both normal and stress circumstances.

Monitoring process

Daily

Due to the economic crisis, it is more important to monitor cash flows and highly liquid assets rather than the supervisory liquidity ratios, because those will ensure the uninterrupted operation of the Group's activities. On a daily basis, a report of highly liquid assets is prepared showing the change in the position compared to the previous day, and submits it to the members of the ALCO. Also, Group Treasury monitors daily the inflows and outflows in the main currencies used by the Group.

Weekly

A weekly report is prepared showing the expected outflows for the current and next quarter as well as of highly liquid assets held during the reported periods. This report is submitted to the Central Bank of Lebanon.

Monthly

The Group Market Risk Management prepares tables indicating compliance with internal and regulatory liquidity ratios, for all banking units and for the Group and submits them to the ALCO.

Ouarterly

The Board of Directors is informed of compliance with internal and regulatory liquidity ratios for each banking unit and for the Group on at least a quarterly basis.

Periodic

The liquidity position is assessed under various scenarios, including simulation of Group-specific crisis and market-wide crisis. The stress scenarios are applied to both on-balance sheet and off-balance sheet commitments, to provide a complete picture of potential cash outflows.

As part of the Group's procedures for monitoring and managing liquidity risk, there is a Group funding crisis contingency plan, which sets out a response in the event of liquidity difficulties. The plan details the steps to be taken, in the event that liquidity problems arise, which escalate to a meeting of the Funding Crisis Committee.

The plan sets out the members of this Committee and a series of possible actions that can be taken. This plan, as well as the Group's Liquidity Policy, are reviewed by ALCO. The latter submits the updated policy with its recommendations to the Board Risk Committee for approval.

As per applicable regulations, the Group must retain obligatory reserves with the central banks where the Group entities operate.

Liquidity ratios

The liquidity position is assessed and managed under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and specifically to the Group. The ratio of FC liquid assets to FC total deposits and other liabilities falling due in the next month is prepared monthly by GMRM and monitored by ALCO. FC liquid assets are defined as FC bonds and placements with banks maturing within thirty days.

The Group is not in breach with the regulatory Liquidity Coverage Ratio (LCR) which is calculated in accordance with Basel III liquidity standards as implemented by the Central Bank of each jurisdiction where the Group operates. It aims at ensuring that each entity has sufficient unencumbered high-quality-liquid assets (HQLA) to meet its liquidity needs in a 30 calendar day liquidity stress scenario during which the entity is assumed to experience outflows at a severe stress level. However, due to the economic crises facing Lebanon, as discussed above, management believes it is more important to monitor daily the inflows and outflows in the main currencies used by the Group rather than the supervisory liquidity ratios.

For the year ended 31 December 2019

49 LIQUIDITY RISK (continued)

Sources of funding

Customer deposits were the main funding source of the Group as at 31 December 2019 and 2018. The distribution of sources and the maturity of deposits are actively monitored in order to avoid concentration of funding maturing at any point in time or from a large number of depositors. The Group monitors the percentage of time deposits that are renewed every quarter and aims to ensure that this percentage is maintained at high levels

The Group stresses the importance of customers' deposits as sources of funds to finance its lending activities. This is monitored by using the advances to deposit ratio, which compares loans and advances to customers as a percentage of clients' deposits.

	2019	2018
	%	%
Loans to deposits ratio		
Year-end	21.97	26.32
Average	23,43	27.28
Maximum	24.84	28.34
Minimum	21,97	26.32

Analysis of financial assets and liabilities by remaining contractual maturities

The table below summarizes the maturity profile of the Group's financial assets and liabilities as at 31 December based on their contractual undiscounted cash flows. The contractual maturities were determined based on the period remaining to each maturity as per the statement of financial position actual commitments. Repayments which are subject to notice are treated as if notice were being given immediately. Concerning deposits, the Group expects that many customers will not request repayment on the earliest date the Group could be required to pay.

The table does not reflect the expected cash flows indicated by the Group's deposit retention history.

For the year ended 31 December 2019

50 OPERATIONAL RISK

Operational risk is defined as the risk of loss or damage resulting from inadequate or failed internal processes, people, systems or external events. The Basel definition of operational risk includes legal risk, and excludes reputational and strategic risks. Still, the failure of operational risk controls may result in reputational damage, business disruptions, business loss, or non-compliance with laws and regulations that can lead to significant financial losses. Therefore, reputational and strategic risks are indirectly mitigated once the operational risks acting as their key drivers are well managed.

The operational risk management framework is implemented by an independent Operational Risk Management department that operates in coordination with other support functions. The Internal Audit provides an independent assurance on the adequacy and effectiveness of this framework through periodic reviews.

Operational risks are managed across the Group based on a set of principles and standards detailed in the Board-approved operational risk management framework. These principles and standards include at a minimum: segregation of duties, four-eye principle, and independency of employees performing controls, reconciliations, and awareness. Controls are also embedded within systems and formalized in policies and procedures.

Incidents are captured and analyzed to identify their root causes. Corrective and preventive measures are recommended to prevent future reoccurrences. Risk and Control Assessments (RCAs) are conducted on an ongoing basis to identify risks and control vulnerabilities associated to existing or new operations, products, processes, activities and systems. Key Risk Indicators are also developed continuously to detect alarming trends. Recommendations to improve the control environment are communicated to concerned parties and escalated to Management as deemed necessary.

Major incidents, RCA findings and operational losses are reported to the Board of Directors and Board Risk Committees periodically as per the governance framework set in the Group Operational Risk policy.

Insurance coverage is used as an additional layer of mitigation and is commensurate with the Group business activities, in terms of volume and nature.

51 LITIGATION RISK

The Group may, from time to time, become involved in legal or arbitration proceedings which may affect its operations and results. Litigation risk arises from pending or potential legal proceedings against the Group (note 43) and in the event that legal issues are not properly dealt with by the Group. Since 17 October 2019, the Group has been subject to an increased litigation risk level as a result of the restrictive measures adopted by Lebanese banks. Management has carefully considered the impact of existing litigation and claims against the Group in relation to these restrictive measures. While there are still uncertainties related to the consequences of these restrictive measures, based on the current available information and the prevailing laws and local banking practices, Management considers that the said claims seem unlikely to have a material adverse impact on the financial position and capital adequacy of the Group.

52 POLITICAL RISK

External factors which are beyond the control of the Group, such as political developments and government actions in Lebanon (note 1) and other countries may adversely affect the operations of the Group, its strategy and prospects. Other important political risk factors include government intervention on the Group's activities and social developments in the countries in which the Group operates, political developments in Lebanon, and the political and social unrest and political instability or military conflict in neighbouring countries and/or other overseas areas. Given the above, the Group recognises that unforeseen political events can have negative effects on the fulfilment of contractual relationships and obligations of its customers and other counterparties which will result in significant impact on Group's activities, operating results and position.

For the year ended 31 December 2019

53 CAPITAL MANAGEMENT

The Group maintains an actively managed capital base to cover risks resulting from potential stressed situations, retain sufficient financial strength and flexibility to meet changes in capital requirements, and comply with national and international minimum regulatory capital adequacy ratios levels at all times. The adequacy of the Group's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision (BIS rules/ratios) as adopted by the Central Bank of Lebanon, which is the lead supervisor of the Group.

The Group recognizes that the adequacy of its capital levels may come under increasing pressure should the deteriorated operating environment be prolonged and depending also on any measures taken by the government and regulating authorities.

On 3 February 2020, the Central Bank of Lebanon issued Intermediary Circular 543 in which it decreased the minimum regulatory capital adequacy ratios levels as reflected in the table below. Under the same circular, the regulator has increased the risk weight on foreign currency exposures to the Central Bank of Lebanon from 50% to 150%, excluding deposits with original maturities less than one year, which are still subject to a 50% risk weight. The Central Bank of Lebanon also requires minimum levels of 7%, 10% and 12% for CET1, Tier 1 and Total CAR respectively for dividends' distribution eligibility.

The following table shows the applicable regulatory capital ratios:

	Common Tier 1 Capital Ratio	Tier 1 Capital Ratio	Total Ca	apital Ratio
Year ended 31 December 2019 Year ended 31 December 2018	7.00% 10.00%	8.50% 13.00%		0.50% 5.00%

For the year ended 31 December 2019

53 CAPITAL MANAGEMENT (continued)

On 4 November 2019 the Central Bank of Lebanon issued Intermediary Circular 532 requiring Lebanese banks not to distribute dividends from the profits of the financial year 2019, and to increase the regulatory capital by 20% of the common equity tier 1 capital as at 31 December 2018 through cash contributions in US Dollars, in two phases: 10% by 31 December 2019 and another 10% by 30 June 2020. The Group did not comply with Central Bank of Lebanon intermediary circular 532 towards increasing its regulatory capital by 10% by 31 December 2019; however, the process of increasing regulatory capital was initiated subsequently and put on hold during COVID-19 crisis.

The capital adequacy ratios as at 31 December 2019 were calculated based on the recorded figures and do not take into consideration the adjustments that will result from the resolution of the uncertainties reflected in note 1. The Group is currently assessing the impact of the future effects of the economic crisis and the restructuring plan on its capital adequacy ratios, based on the various available scenarios. However, until all uncertainties are resolved the amount of the recapitalization needs that will be required cannot be determined presently.

54 SUBSEQUENT EVENTS

Outbreak of COVID-19

The COVID-19 pandemic has had, and continues to have, a material impact on businesses around the world and the economic environments in which they operate. It has caused disruption to businesses and economic activities and increased the level of uncertainty in domestic and international markets. Regulators and governments across the globe have introduced schemes to provide financial support to parts of the economy most impacted by the COVID-19 pandemic.

In the case of the Group, similar to many entities for which the operating environment is mostly in Lebanon, the impact of COVID-19 cannot be isolated and assessed independently from the economic crisis that the country is witnessing, which is described in note 1. COVID-19 will add up to the severity of the economic downturn from a commercial, regulatory and risk perspective. Future impairment charges, already subject to high uncertainty and volatility due to the severe crisis in Lebanon described in note 1, may be subject to further uncertainty and volatility as a result of the COVID-19 pandemic and related containment measures. More adverse economic scenarios and macro-economic variables, with higher probabilities than as at 31 December 2019 will be considered for Expected Credit Losses financial impact in the first half of 2020.

It remains unclear how this will evolve through 2020 and thereafter, and the Group continues to monitor the situation closely. Any and all such events mentioned above will add up to the already material adverse prospects on the Group's business, financial condition, results of operations, prospects, liquidity, capital position which is disclosed in note 1.
