BLOM Bank SAL (the “**Bank**”) announces that it has applied for the withdrawal of its Global Depositary Shares (the “**GDSs**”) (ISIN: US0936881095; trading symbol: BLOBK) from trading on the Euro MTF and from the Official List with proposed effect from 24 November 2020. **1 Reason for the Delisting:** Lebanon is undergoing severe financial, economic and fiscal crises, which has had a significant adverse effect on Lebanese banks, including the Bank. The Bank believes the extreme uncertainties for the Bank and its shareholders resulting from this situation are incompatible with the maintenance of the listing of the Issuer’s GDSs in Luxembourg. In addition, given the low volume of GDSs traded on the Luxembourg Stock Exchange and the limited liquidity thereof, the costs and administrative burden of maintaining the listing are disproportionate to the benefit thereof. The Bank also intends to remove the GDSs from the London Stock Exchange’s International Order Book. The GDSs and the shares underlying the GDSs will continue to be listed and admitted to trading on the Beirut Stock Exchange. **2 Continuation of Listing on the Beirut Stock Exchange:** The GDSs and the underlying shares of the Bank represented by the GDSs will continue to be listed and traded on the Beirut Stock Exchange. **3 Global Deposit Receipt Program:** The Bank is not terminating its Global Deposit Receipt Programme. - **BLOM Bank Financial Results for Year 2019**

After legitimate delay approved by Banque Du Liban's (BDL), BLOM Bank announced today its audited financial results for year 2019. The results obtained were largely as expected, and affected by the impact of the financial and economic crisis that has struck Lebanon since October 2019. Net profits came to \$115.411 million, lower by 77.44% from year 2018. In terms of balance sheet items, assets stood at \$33.296 billion, lower by 9.38%; deposits were \$26.462 billion, lower by 2.78%; loans decreased to \$5.814 billion, less by 18.85%; and shareholders' equity declined to \$3.156 billion, less by 3.44%. Net profits emanated mostly from our units outside Lebanon, especially from our unit operating in Egypt which constituted 43% of consolidated profits. As to our branches operating in Lebanon, they did not generate any profits in 2019, as a result of the provisions that the Bank took in accordance with Banque Du Liban's (BDL) circulars, so as to cover for the credit risks arising from the current conditions prevailing in Lebanese financial markets. Moreover, BLOM Bank is required to comply by all BDL circulars as stipulated in the Code of Money and Credit, especially article 208. As a result, the Bank has complied by these circulars when calculating expected credit losses in accordance to the specified ratios listed in Appendix 6 of BDL circular number 44, and as amended by the intermediate circular number 543

issued by BDL on 3/2/2020 for the year 2019 accounts. Equally important, the Board of Directors has noted and approved the adverse opinion of the external auditors concerning the financial statements of our bank in Lebanon for year 2019. The Board has unanimously decided, for the sake of transparency, to publicize this adverse opinion of the external auditors, and this decision has been approved by the General Assembly. Last but not least, BLOM Bank would like to take this opportunity to express its regret for all the restrictions that it was obliged to impose -- like the rest of the banking sector and in coordination with BDL – and that were applied without favoritism towards any of its clients, shareholders, or employees.

#### **BLOM Bank’s Financial Results for the First Nine Months of 2014: Steady Growth and High Profitability Ratios:**

BLOM Bank published its un-audited financial results for the first nine months of 2014. High profitability ratios and balanced growth marked the Bank’s steady performance, despite the continued economic and political risks in Lebanon and the region. Net profits increased to \$269, implying an ROAE of 15.26% and an ROAA of 1.34%. Of prime significance in achieving these profitability ratios is the Bank’s notable operational efficiency as reflected in a cost-to-income ratio of 39.22%, the lowest among listed banks.

The Bank’s renowned conservative and measured policy characterized also the balanced growth in its balance sheet. Assets increased to \$27.5 billion, higher by 7.03% on the same period in 2013. The asset increase was driven mainly by an increase in deposits, which rose to \$23.7 billion, up by 6.24%. Loans to customers increased to \$6.97 billion, higher by 11.79%; while shareholders’ equity rose to \$2.5 billion, up by 11.13%, giving the bank an ample capital cushion to expand and increase its loan portfolio.

BLOM Bank’s financial results remain strongly in line with the Bank’s strategy of maintaining a solid financial position. Non-performing loans stood at 4.19%, with a coverage ratio from special provisions equal to 77% and rising to 134% if we include real guarantees. Also, Basel 3 capital adequacy reached a healthy ratio of 17.5%, and primary liquidity a very decent ratio of 65%. These impressive financial indicators, in addition to the Bank’s good financial results, attest to the Bank’s unanimous choice as the Best Bank in Lebanon from the leading international financial institutions.

**Ñ BLOM Bank: Highest Rates of Profits for the first Nine Months of 2010 Among Listed Lebanese Banks**

Blom Bank published its non-audited financial results for the first nine months of 2010, and they reveal once again Blom Bank's leading position in the Lebanese banking system. Profits reached \$235.8 million, higher by \$30.8 million or 15% from the same period last year. This level of profits also implied the highest rates of return on average equity and assets among listed Lebanese banks at 19.9% and 1.49% respectively. This exceptional performance was obtained as a result of its best and most notable control over risk and expenses, as shown by its lowest cost to income ratio at 35.9% and its excellent coverage ratio for non-performing loans at 101.7%.

Blom Bank also obtained strong and balanced growth in its balance sheet which again gives first priority to its control over risk and expenses. Assets for the first nine months of 2010 reached \$22.1 billion, up by \$2 billion or 10% from same period in 2009. Similarly, deposits increased to

\$19.2 billion, higher by \$1.8 billion or 10.6%; and shareholders' equity reached \$1.9 billion, an increase by \$269.5 million or 16.9%.

As always, these financial results reaffirm Blom Bank's top performance and the success of its conservative policy and its strategy of organic and balanced growth.
